

**SPECIAL PRESENTATION ON DATA CENTER AND
TELECOM INFRASTRUCTURE**

WHO WE ARE

Lambert Electromec Limited is an international leader in Engineering, Procurement & Construction (EPC) and in high quality Mechanical, Electrical and Plumbing (MEP) such as:

Data centers

Building services (Offices, Hospitals, Hotels, Institutions, Factories, Mixed-Use, Residential, etc.) and Industrial Plants

Power plants and substations

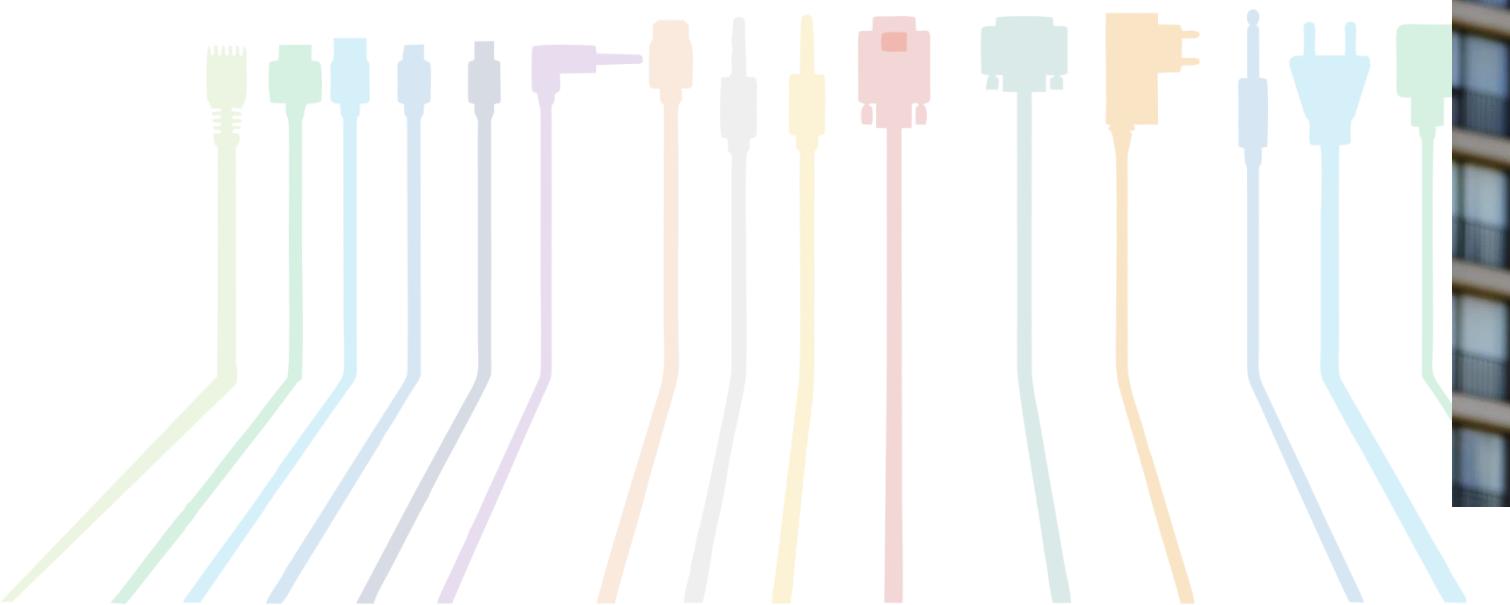

MEP for infrastructural and enabling works in Rail-stations, Stadiums, Ports, etc.

Oil & Gas Modular refineries

HISTORY

Lambert Somec Nig. Ltd . Was created in affiliation with Lambert Somec Inc., a leading Electromechanical construction company from the province of Quebec in Canada. Before separating with its Nigerian partner in 2004, Lambert Somec Inc. passed on its heritage of first class professionalism, top engineers and its exceptional overall operation system.

OFFICES

Cote d'ivoire

Cote d'ivoire office at covers 100sqm of office space. Situated at Cocody Danga Villa No 6, Rues des cannas 26 Bp 13777 abidjan 26, Abidjan - Cote d'Ivoire.

Ghana office

The Ghana office covers 180sqm of office space. Situated at SU Towers, 4th Floor No.18 Castle Road, Accra, Ghana

Lagos Nigeria

Over 1,250sqm of office space in the Ikoyi - Lagos HQ and 10,000sqm of workshop, fabrication, storage and warehouse at Eko Akete, Lekki, Lagos

Abuja office

Office space of 350sqm, with a central storage and fabrication yard measuring 8,500sqm located 50km from the office at Iju Industrial zone of FCT.

Port Harcourt office, Port Harcourt Nigeria.

Office space of 580sqm with a storage area of 1,200sqm at the Trans Amadi Layout in Port Harcourt.

WHAT WE DO

BUILDING &
FACTORIES
ELECTRICAL AND
MECHANICAL
ENGINEERING

POWER
GENERATION AND
DISTRIBUTION

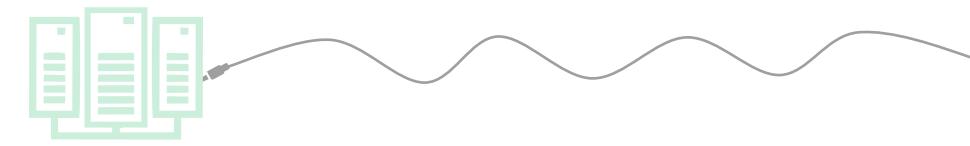

DATA CENTRE &
TELECOM
INFRASTRUCTURE

OIL AND GAS, E&I
AND PIPING

MAINTENANCE

INDUSTRIES WE SERVE

Lambert Electromec continuously expands its resources and services to meet the changing needs of its customers in a rapidly evolving industry, our focus industries are as follow:

Banks

Oil & Gas facilities

Telecommunication Service

Factories

Healthcare

Hotel/Apartment Buildings

Large Enterprise

Malls

Educational Institution

New Construction

Offices

Small & Medium Business

WHAT WE PROVIDE

High Quality, Precision
Engineering and
Installation

Added Value Engineering
/Alternate Solutions

Highly Skilled Workforce

Timely Delivery

Quality Assurance
and Control

Best-in-Class HSE Measures
and Procedures

SUCCESS PILLARS

01

CERTIFICATIONS

- ISO 9001:2015
- ISO 14001:2015
- ISO 45001:2018

High standard related to quality management and communication systems

02

GEOGRAPHIC PRESENCE

- ✓ Offices in the Gulf, Europe & Africa
- ✓ Leverage technology knowledge across international offices.
- ✓ Enhanced procurement

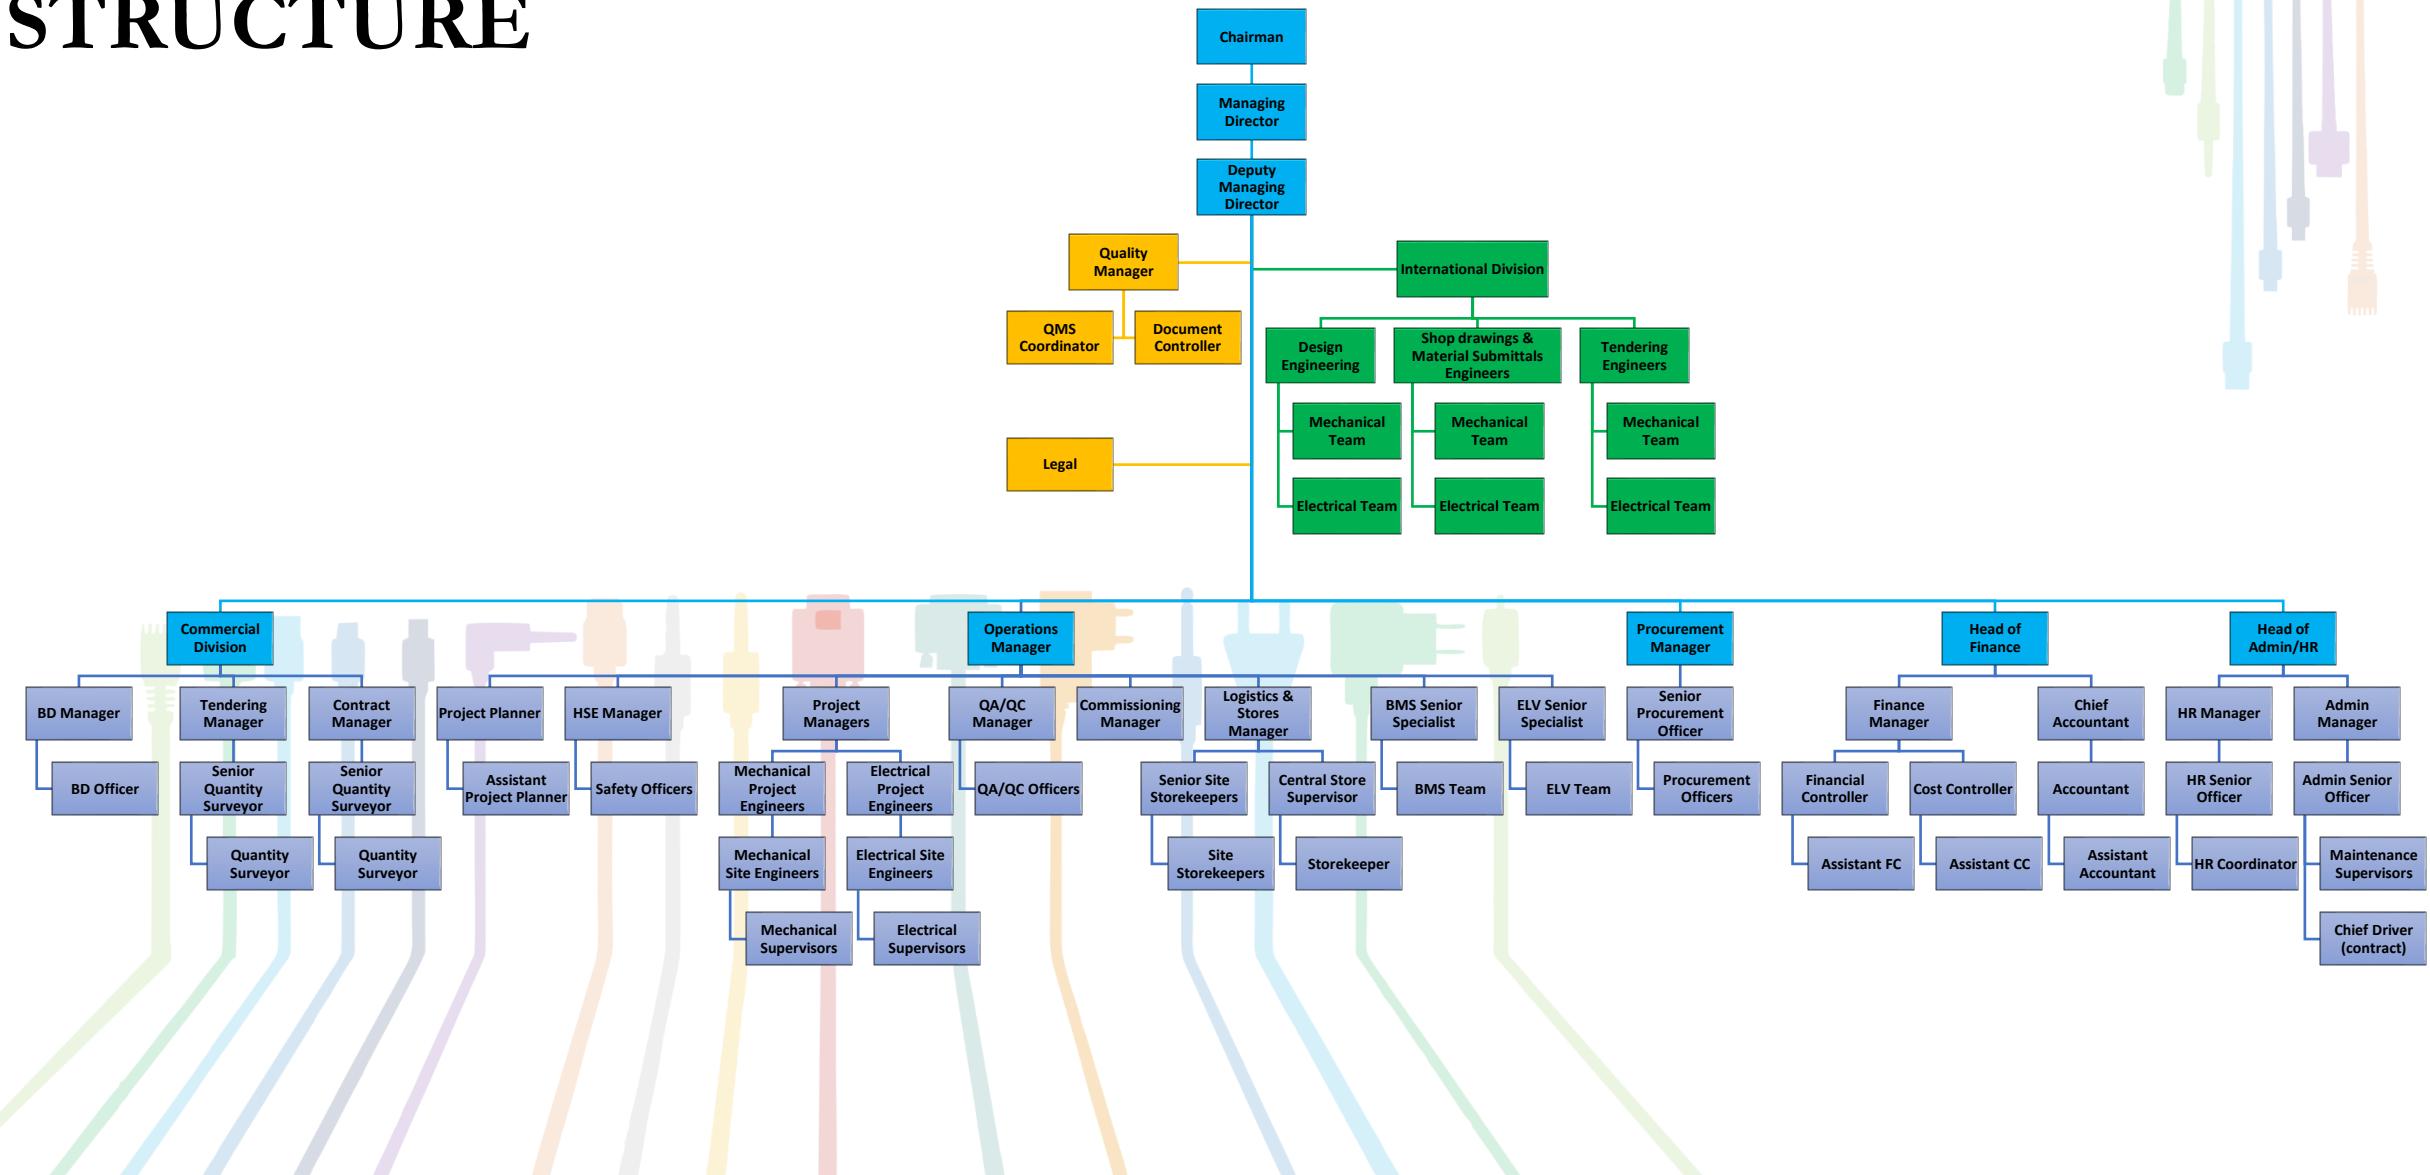

03

CANADIAN HERITAGE

Technical and work culture from the Canadian company Lambert Somec

COMPANY STRUCTURE

DATA CENTER FACILITY

Lambert Provides Design & Build Data Center Solutions covering the below Passive IT Infrastructure components

Power

- UPS Systems (Stand alone and Modular)
- Panel Boards (Main and Distribution)
- Power Distribution Units
- STS (Static Transfer Switch)

Cooling

- CRAC DX
- LCP
- Chillers
- CRAH

Containment

- Hot Aisle Design
- Cold Aisle Design

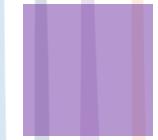

Cabinets

- IT Racks
- Network Racks
- Server Racks
- UPS Racks

Environmental Monitoring System

- Temperature Sensors
- Humidity Sensors
- Leak Detector Sensors

Structured Cabling

- Copper Solution
- Fiber Solution

Raised Floor

DCIM Data Center Infrastructure Management Software

Civil & Electrical Works

- False Ceiling
- Lighting

Physical Security

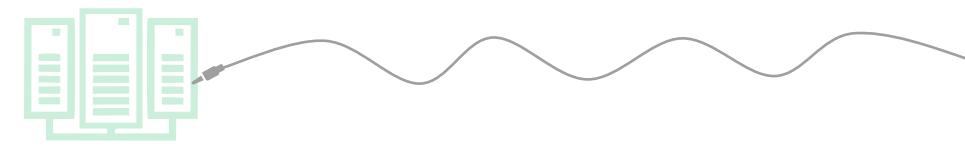

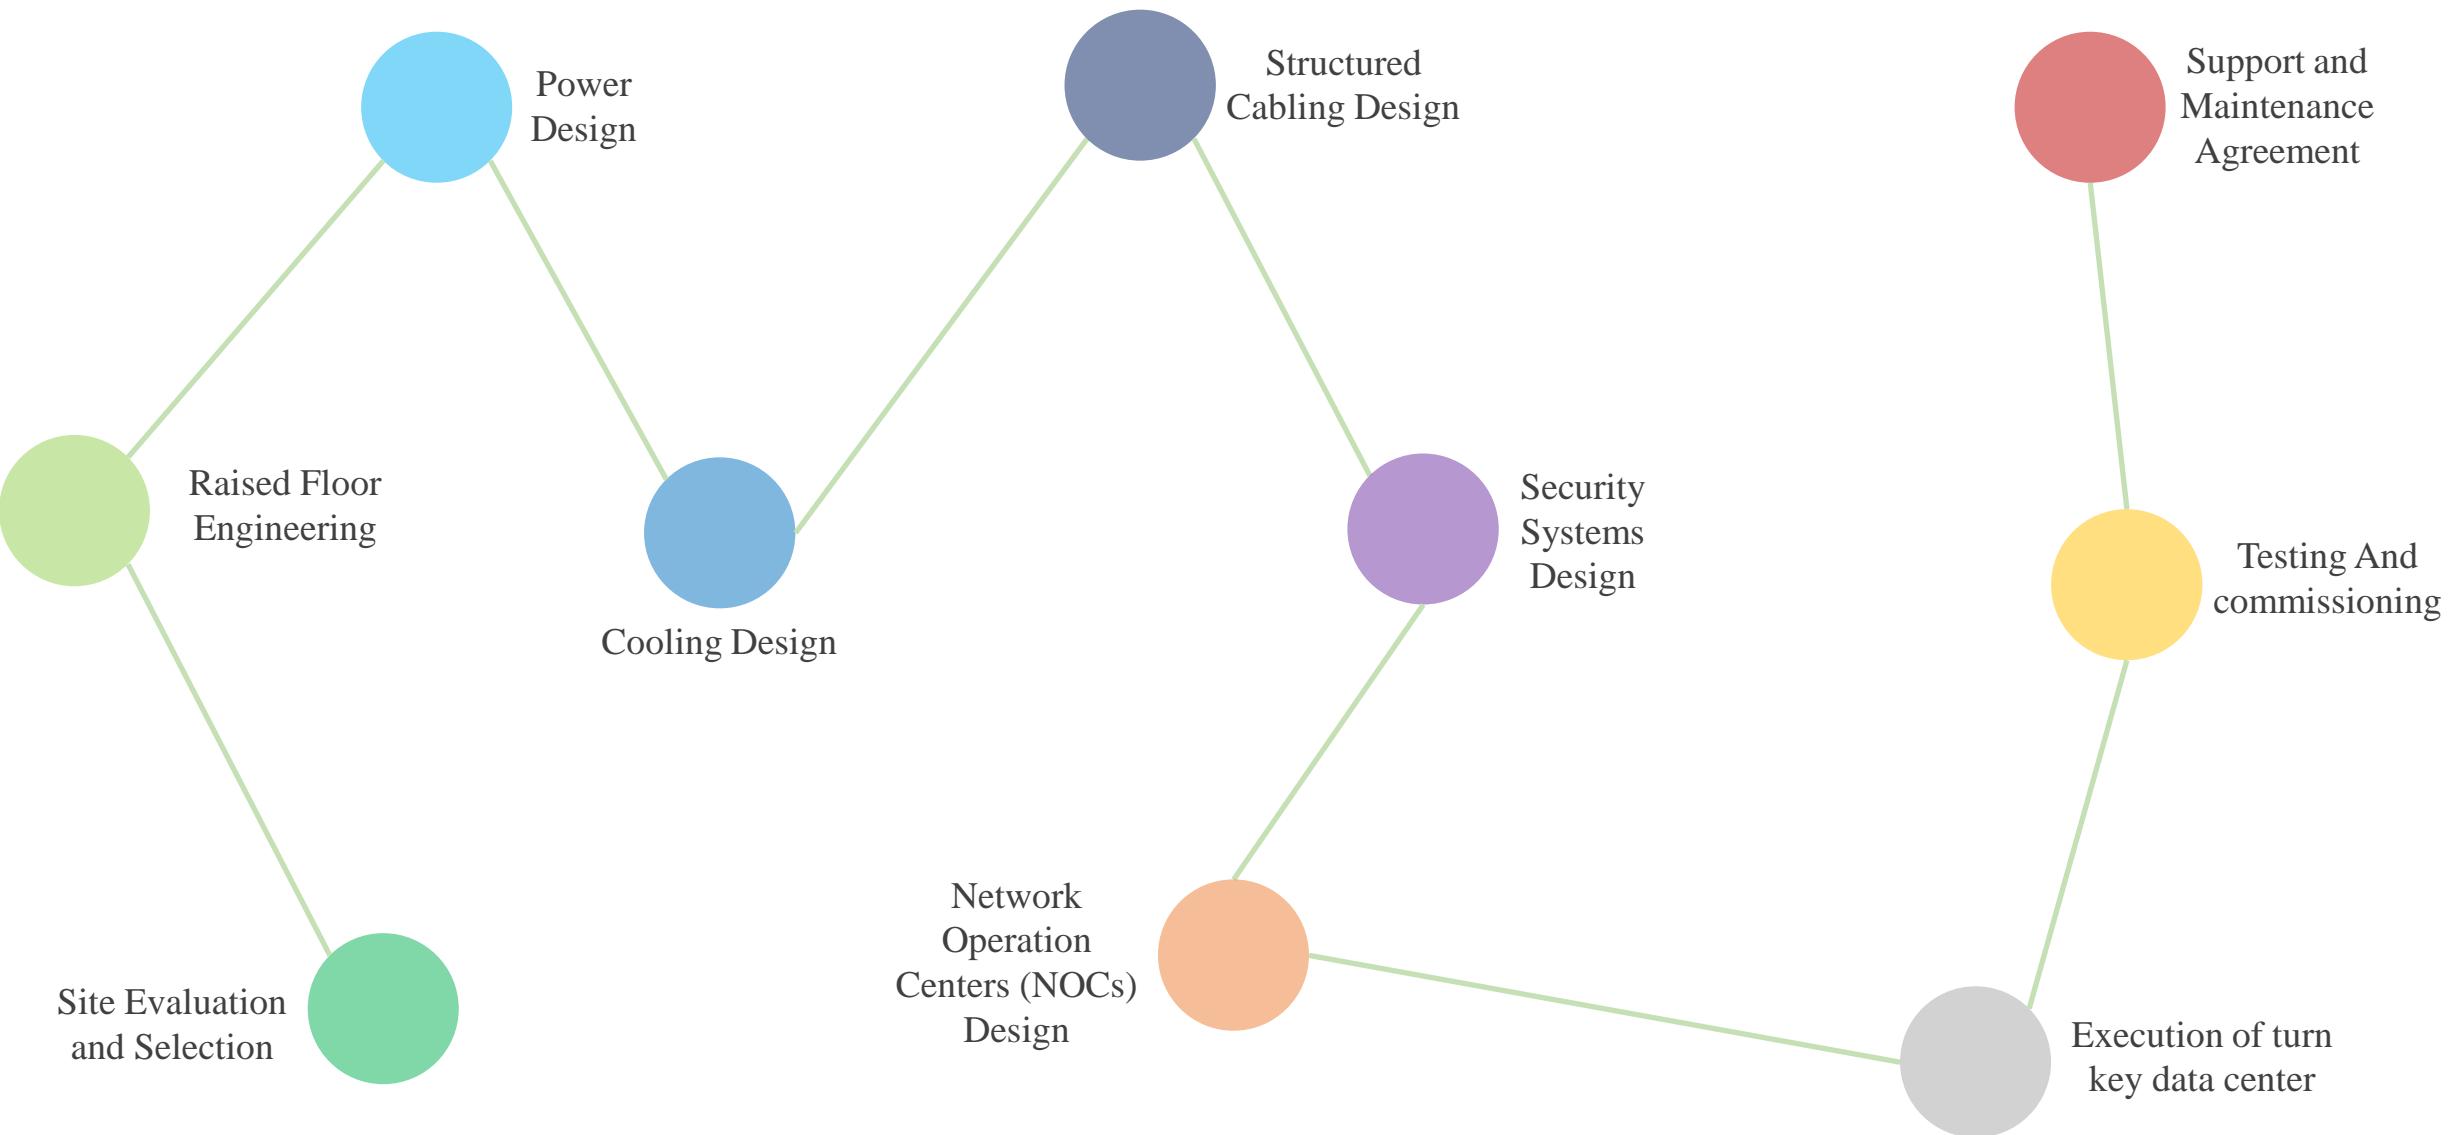

- Access Control
- CCTV
- Intrusion

Fire Fighting and Fire Alarm System

DATA CENTER FACILITY

DATA CENTER FACILITY DESIGN

Our ATD certified engineers will provide Tiering design according to Uptime Institute to meet client's requirements :

- Achieve the desired level of site infrastructure performance or uptime (increase the availability).
- Reduce the complexity of IT environment management.
- Improve Productivity and time.
- Protect your critical data through integrating data security, backup and recovery strategies that improve efficiencies and reduce upgrade costs.
- Optimizing data center efficiency to realize significant cost savings.
- Incorporating virtualization to consolidate resources and greatly reduce IT Costs.
- Ensuring business continuity in the event of a disaster with comprehensive recovery plans.

DATA CENTER FACILITY DESIGN METHODOLOGY

POWER DESIGN

The proposal will be based on the following:

Number of distribution paths according to the required Tier level

Active capacity components needed to support the IT load

The design covers the selection of

Back up power source (Generators)

Required utility supply load

Main distribution panel boards (paths as per required tier level)

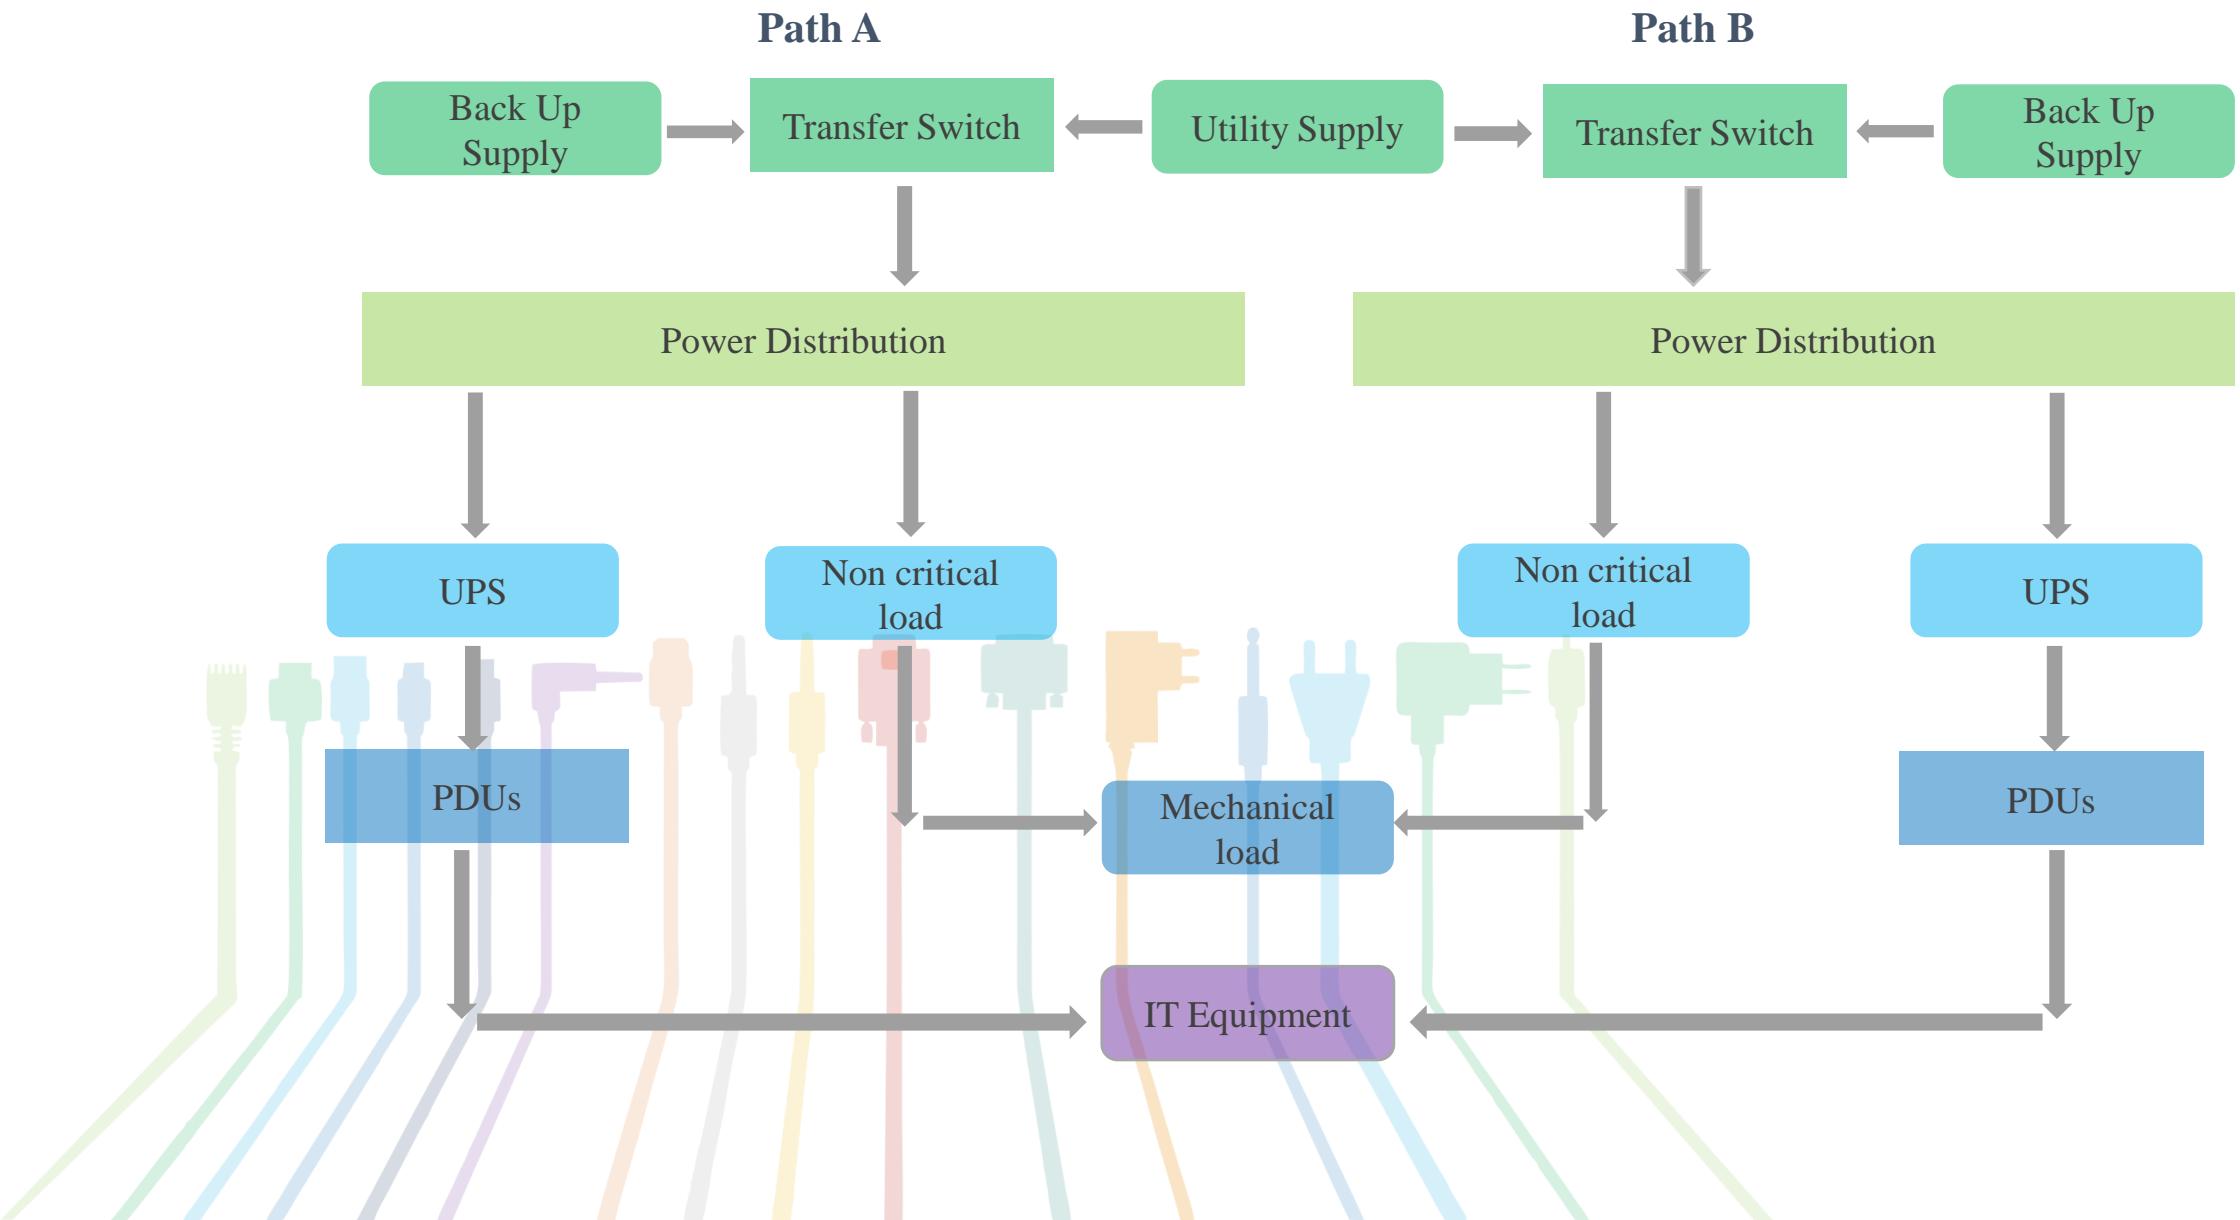

UPS system

Power distribution units feeding the critical loads

Static transfer switches providing the redundancy for single powered IT loads

POWER DESIGN

COOLING DESIGN

METHODS OF COOLING

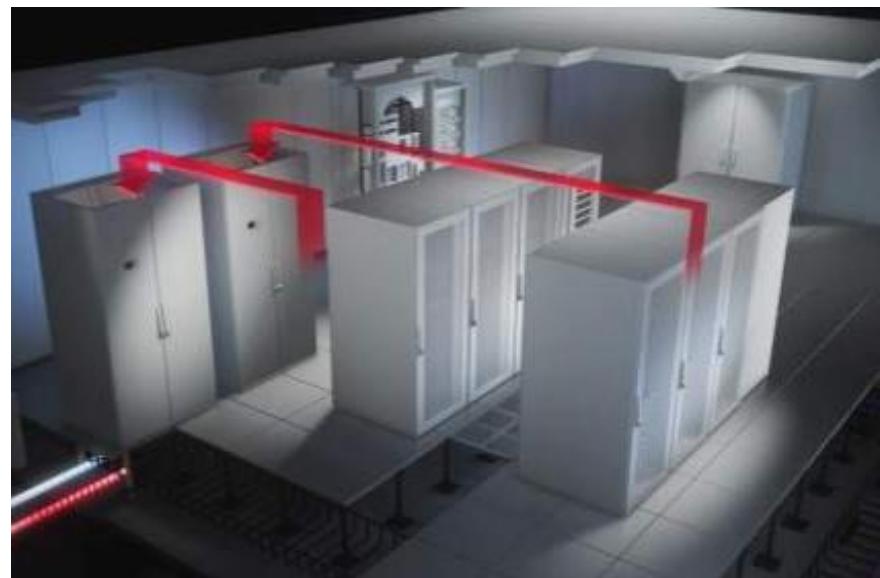

Method A

Room Cooling For low power consumption per rack ($=<4 \text{ kW}$) :

CRAC

OR

Chilled water supply or DX

Principle

Cold air moves under the raised floor.

Racks are cooled through perforated tiles and perforated server doors.

Warm exhaust air at rear door.

CRAC unit takes in the warm air.

A heat exchanger cools down the air.

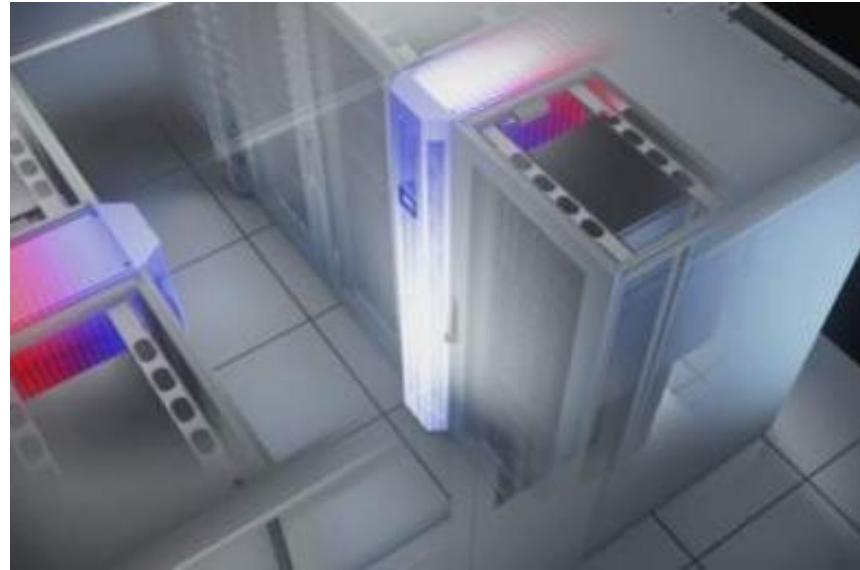

Circulation starts again.

Method B

In Row Cooling FOR Mid range power consumption (<10 kW):

Heat Exchanger inside rack row

Chilled water or DX

Principle

Cold air blown in the cold aisle

Perforated server doors

Warm exhaust air at rear door

Heat exchanger takes in warm air

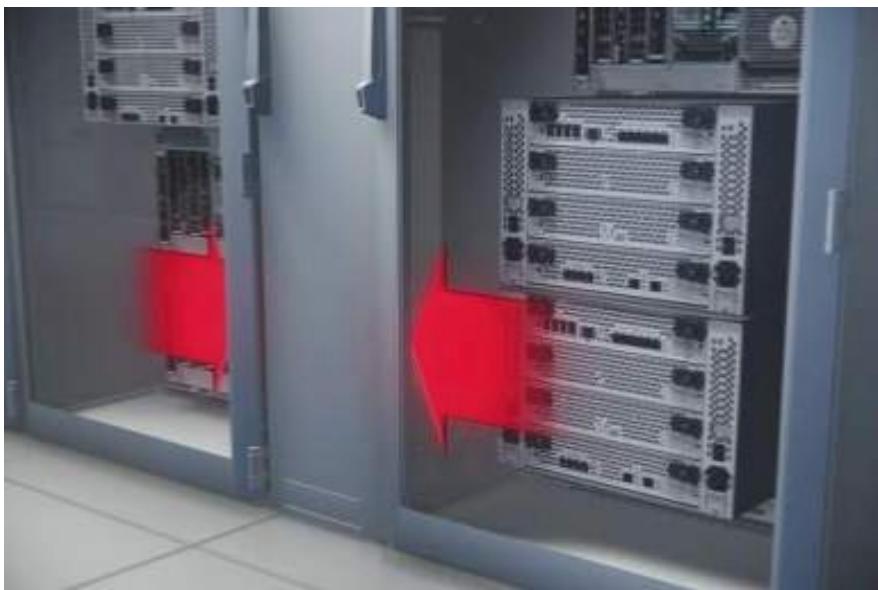

Circulation re-starts

Method C

In Rack Cooling for High power consumption (>10 kW)

Heat exchanger in row of racks

Dedicated to one or two racks

Principle

Cold air blown behind glass door in front of the servers

Warm exhaust air at backside of servers but inside rack

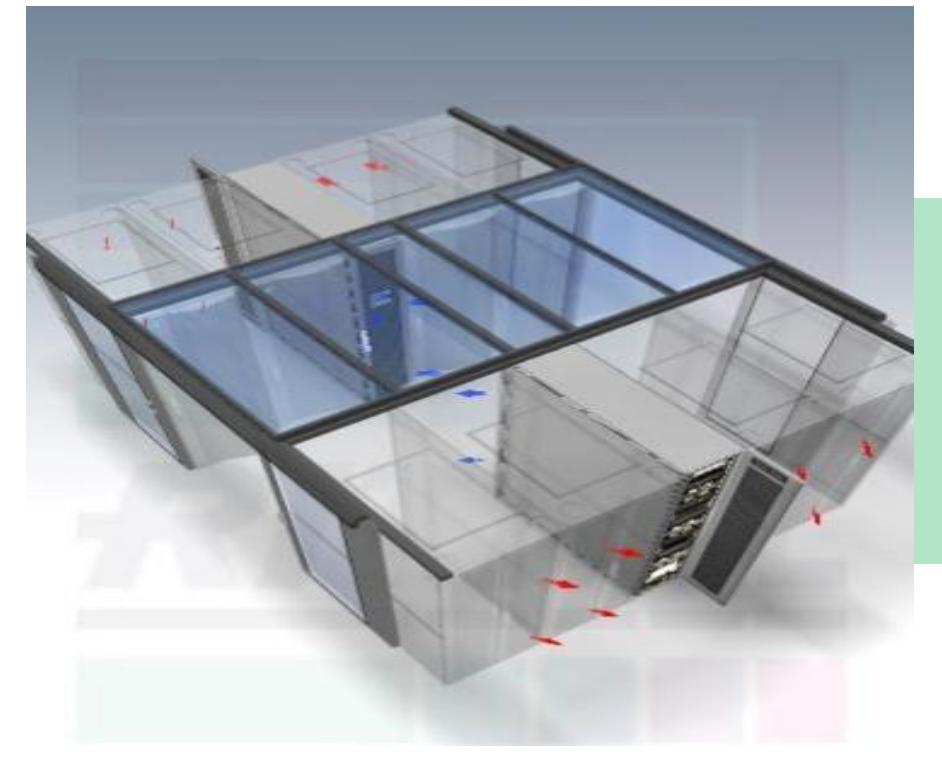

Exhaust air will be taken in by heat exchanger Circulation re-starts

OTHER COMPONENTS DESIGN

Aisle Containment

Methods:

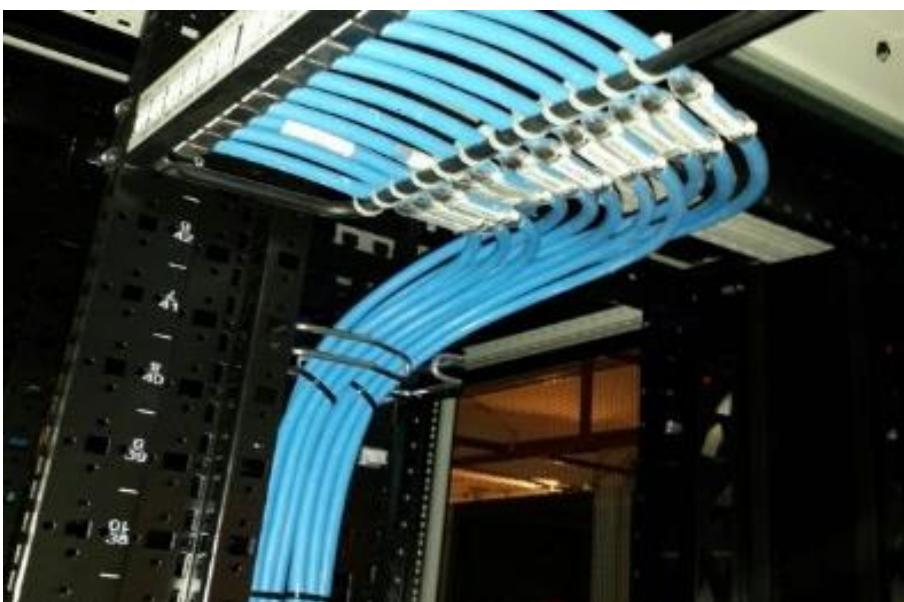

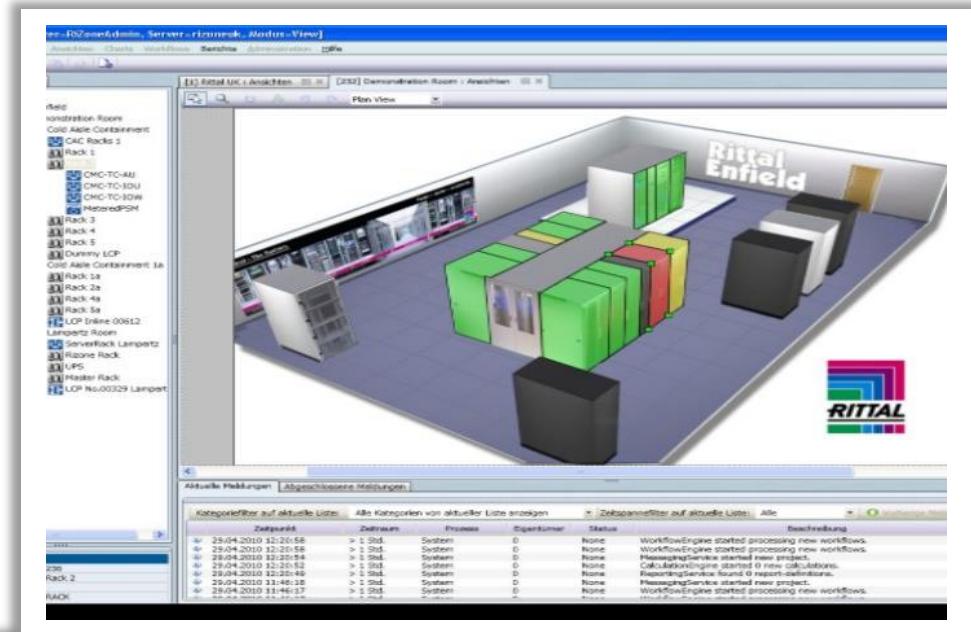

- A cold-aisle containment system (CACS) encloses the cold aisle, allowing the rest of the data center to become a large hot-air return plenum. By containing the cold aisle, the hot and cold air streams are separated. Note that this containment method requires that the rows of racks be set up in a consistent hot-aisle / cold-aisle arrangement.
- A hot-aisle containment system (HACS) encloses the hot aisle to collect the IT equipment's hot exhaust air, allowing the rest of the room to become a large cold-air supply plenum. By containing the hot aisle, the hot and cold air streams are separated. Note that this containment method requires that the rows of racks be set up in a consistent hot-aisle / cold-aisle arrangement. Note that there are two basic methods for containing the hot aisle – row-cooled hot aisle containment and ducted hot aisle containment.
- Regardless of the type of containment system, people still need to work inside a data center. This uncontained area must be kept at a reasonable temperature so as not to violate health and human safety regulations for exceeding wet-bulb globe temperature (WBGT)⁶. Note the following difference in the uncontained area:
 - With cold-aisle containment, the uncontained area becomes the same temperature as the hot aisle.
 - With hot-aisle containment, the uncontained area becomes the same temperature as the cold aisle .

Environmental monitoring System

- Leak Detectors.
- Temperature and humidity sensors.
- Doors Status.

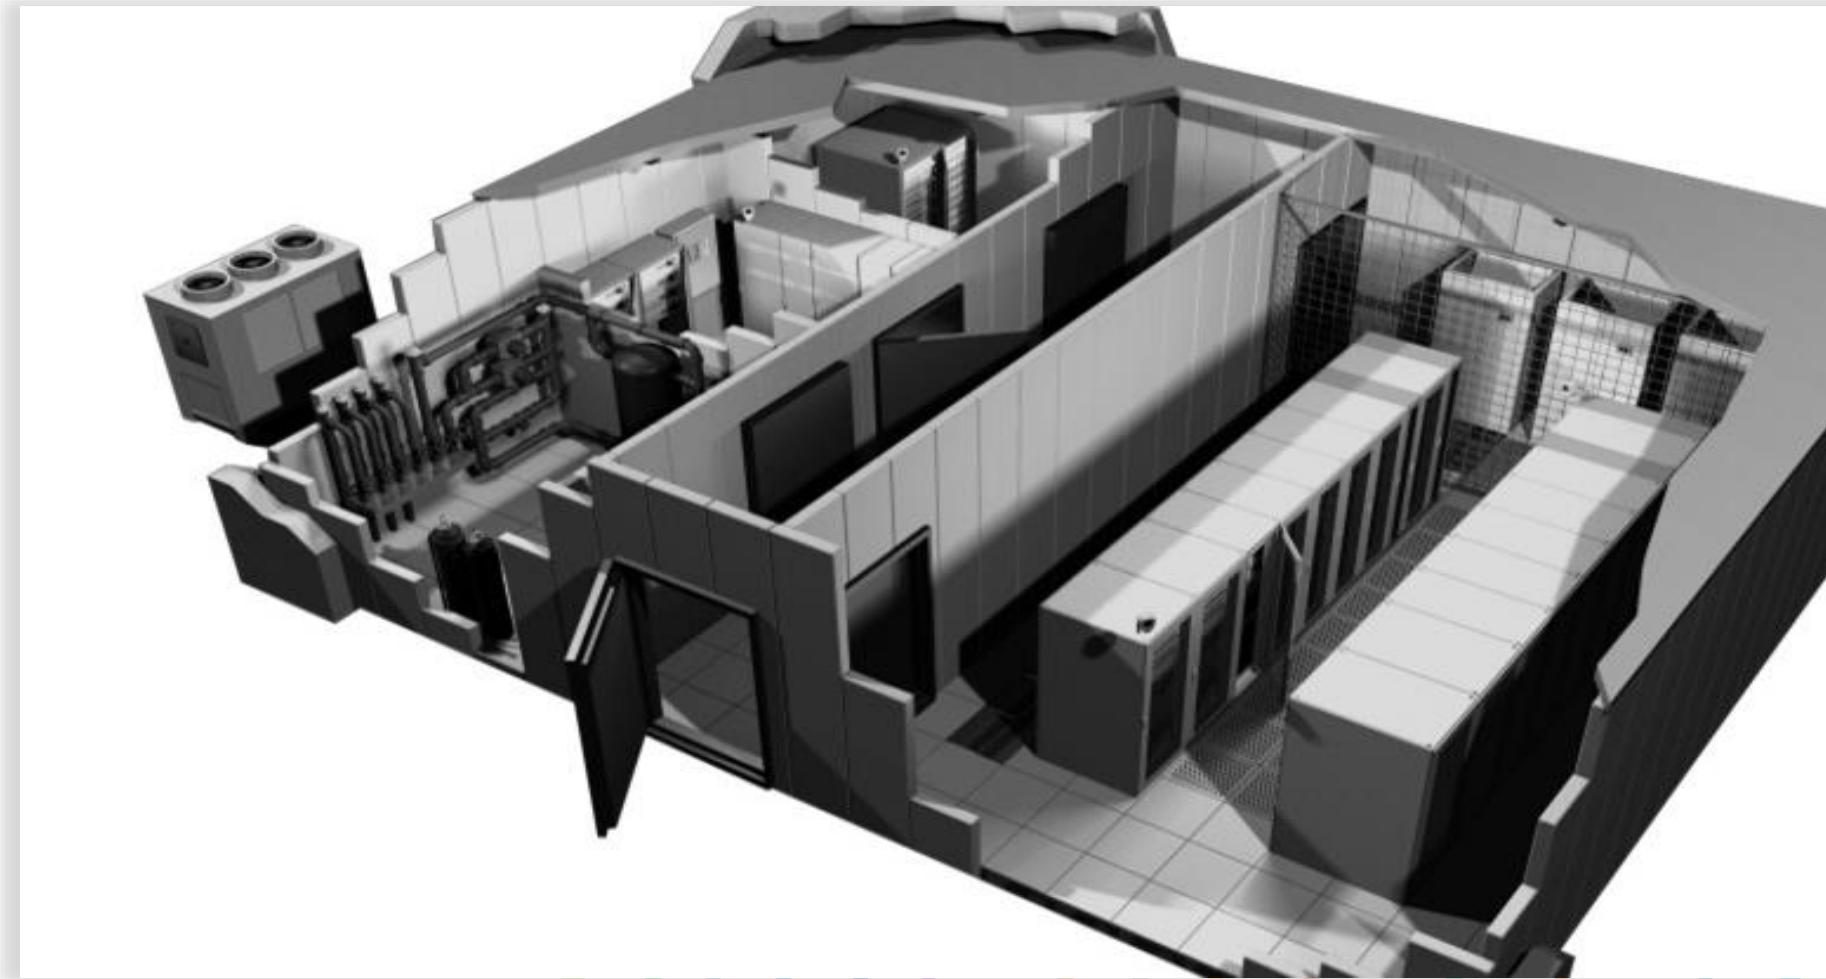

DCIM Monitoring System

Structured Cabling Design

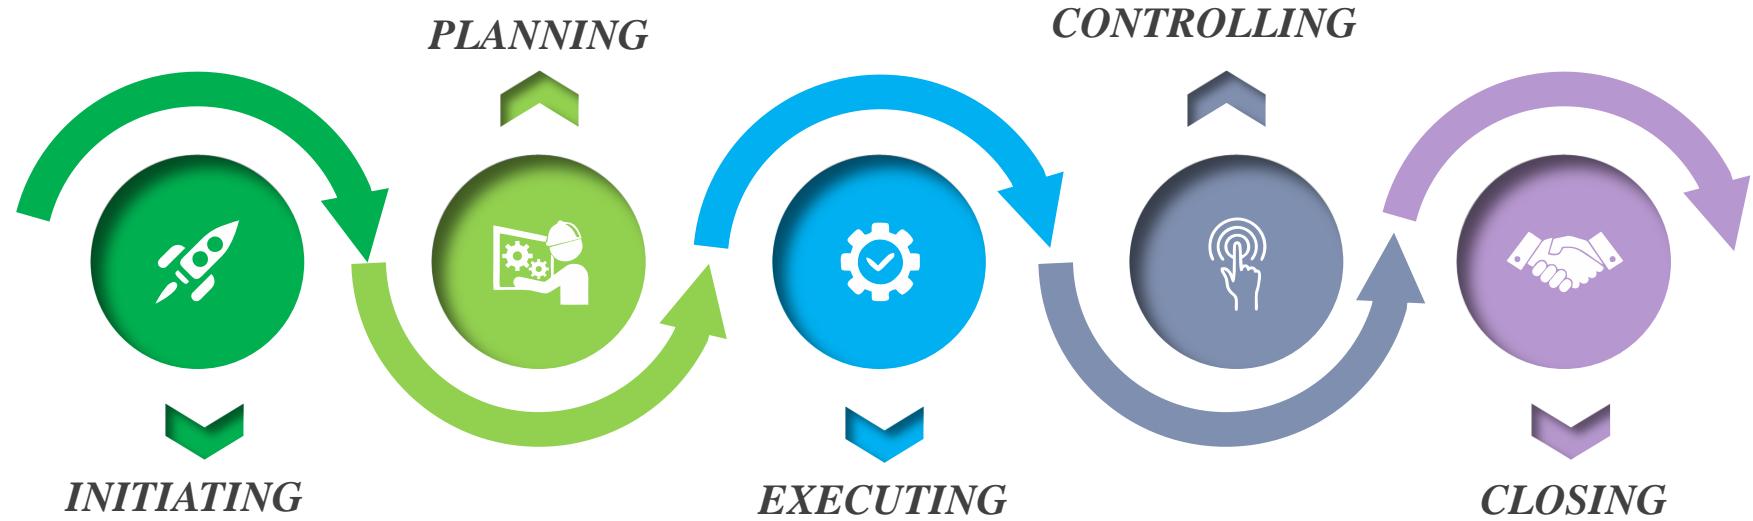

- Copper and Fiber Design by certified team
- Indoor and outdoor Design
- Horizontal and Vertical connectivity
- Latest technology proposal (Cat7, Cat8, Pre-terminated Fiber Cables...)

DATA CENTER FACILITY EXECUTION METHODOLOGY

DATA CENTER FACILITY EXECUTION METHODOLOGY

Our Project management methodology will consist of five phases

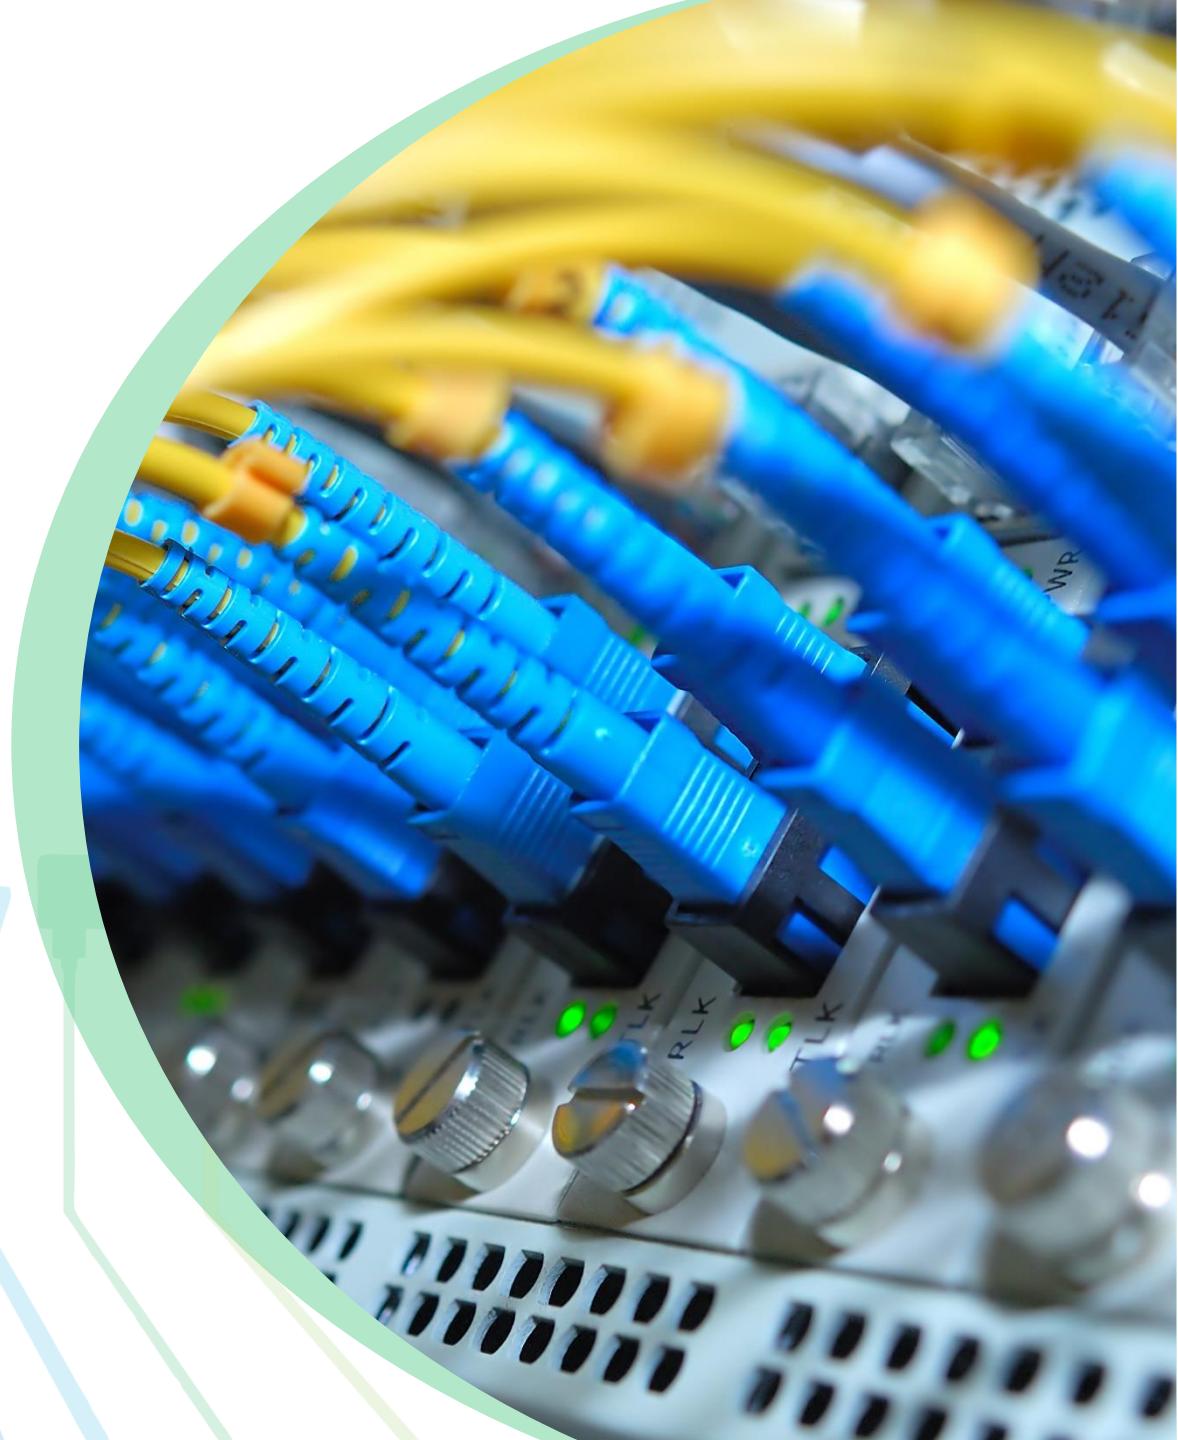

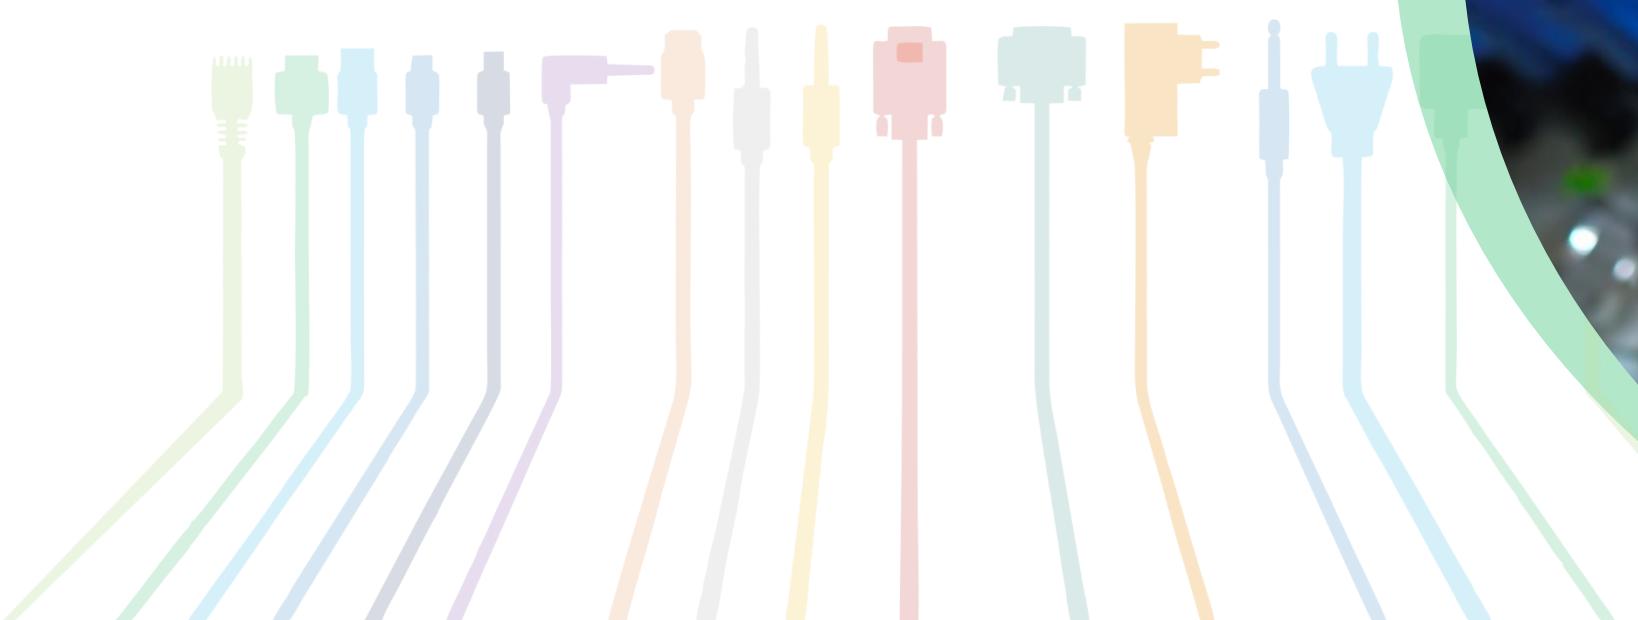

The team responsible for the execution will consist of

- Dedicated Project Manager.
- Data Center Certified Engineers.
- Certified team leaders and technicians.

Initiating phase

This phase Includes Bid Qualification/Proposal phases from the business lifecycle. PM engagement is authorized at this level to provide project management related input.

- What the project will create / implement
- Study Customer RFP / Requirements
- Business Risk Assessment
- Opportunity Feasibility
- High level Design and Implementation Planning

Planning Phase

This phase focuses on scoping and planning the project. Planning is split into two phases:

Pre-Contract

- Establishing the final scope.
- Expected levels of quality.
- More accurate estimated timeline and budget.
- Project Charter / SoW
- Proposal Submission

Post-Contract

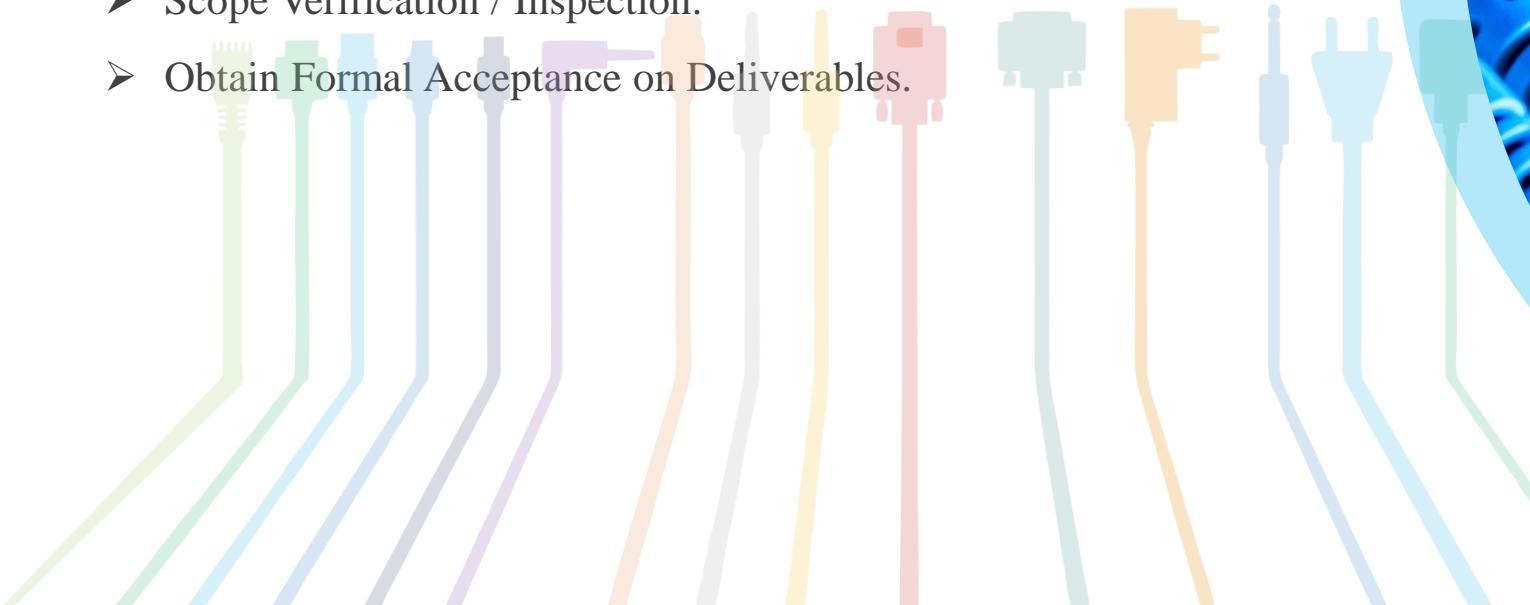

- Resources assignment / allocation.
- Project kick off meeting.
- Workshops for training and implementation requirement gathering.
- Project Definition Document.
- Planning for the execution, design & acceptance documents preparations.

Executing Phase

This Phase includes the delivery of a complete accepted solution that meets fully the project requirements.

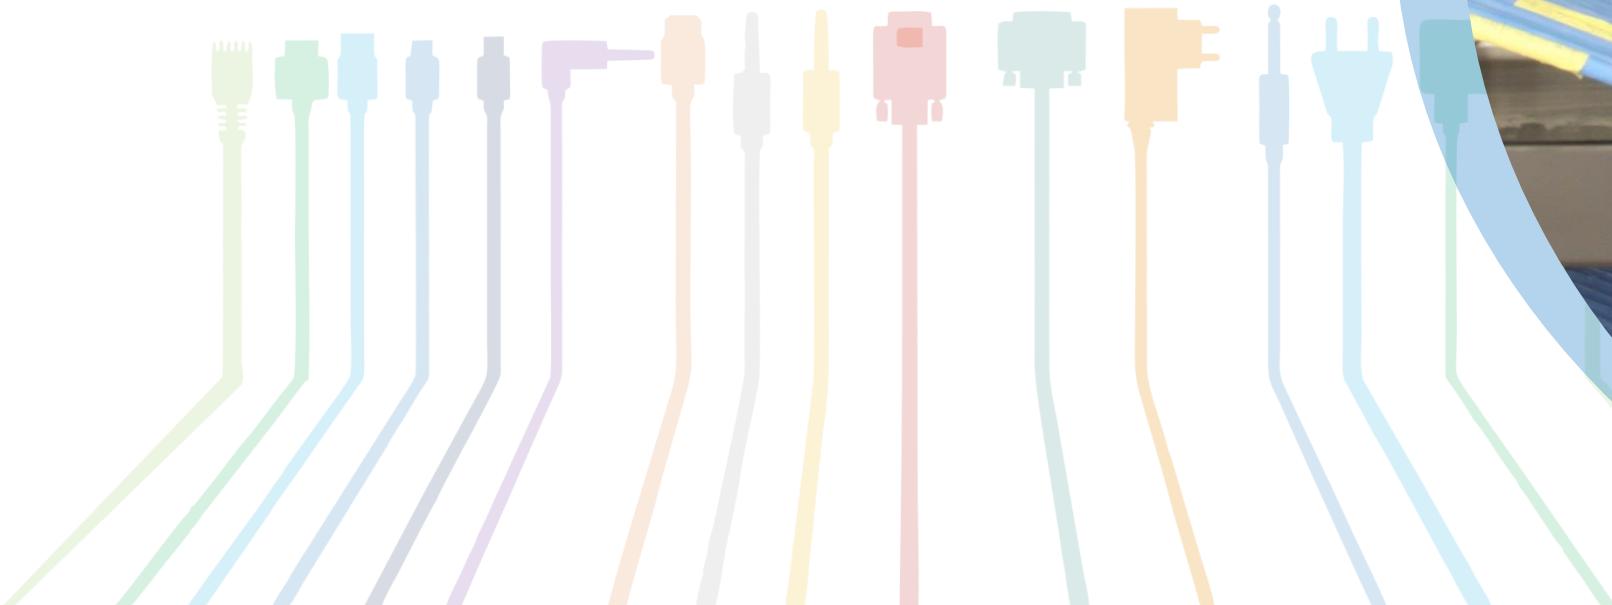

- Deliverables Execution / Submittals.
- Design Documents Compilation (LLD, Migration Plan, NRFU).
- Shop Drawings Preparations, if required.
- Installation / Staging, configuration, swapping, commissioning, testing of equipment.
- Communication Management.
- Scope Verification / Inspection.
- Obtain Formal Acceptance on Deliverables.

Controlling Phase

This phase runs throughout the life of the project to keep stakeholders informed and project under the right control.

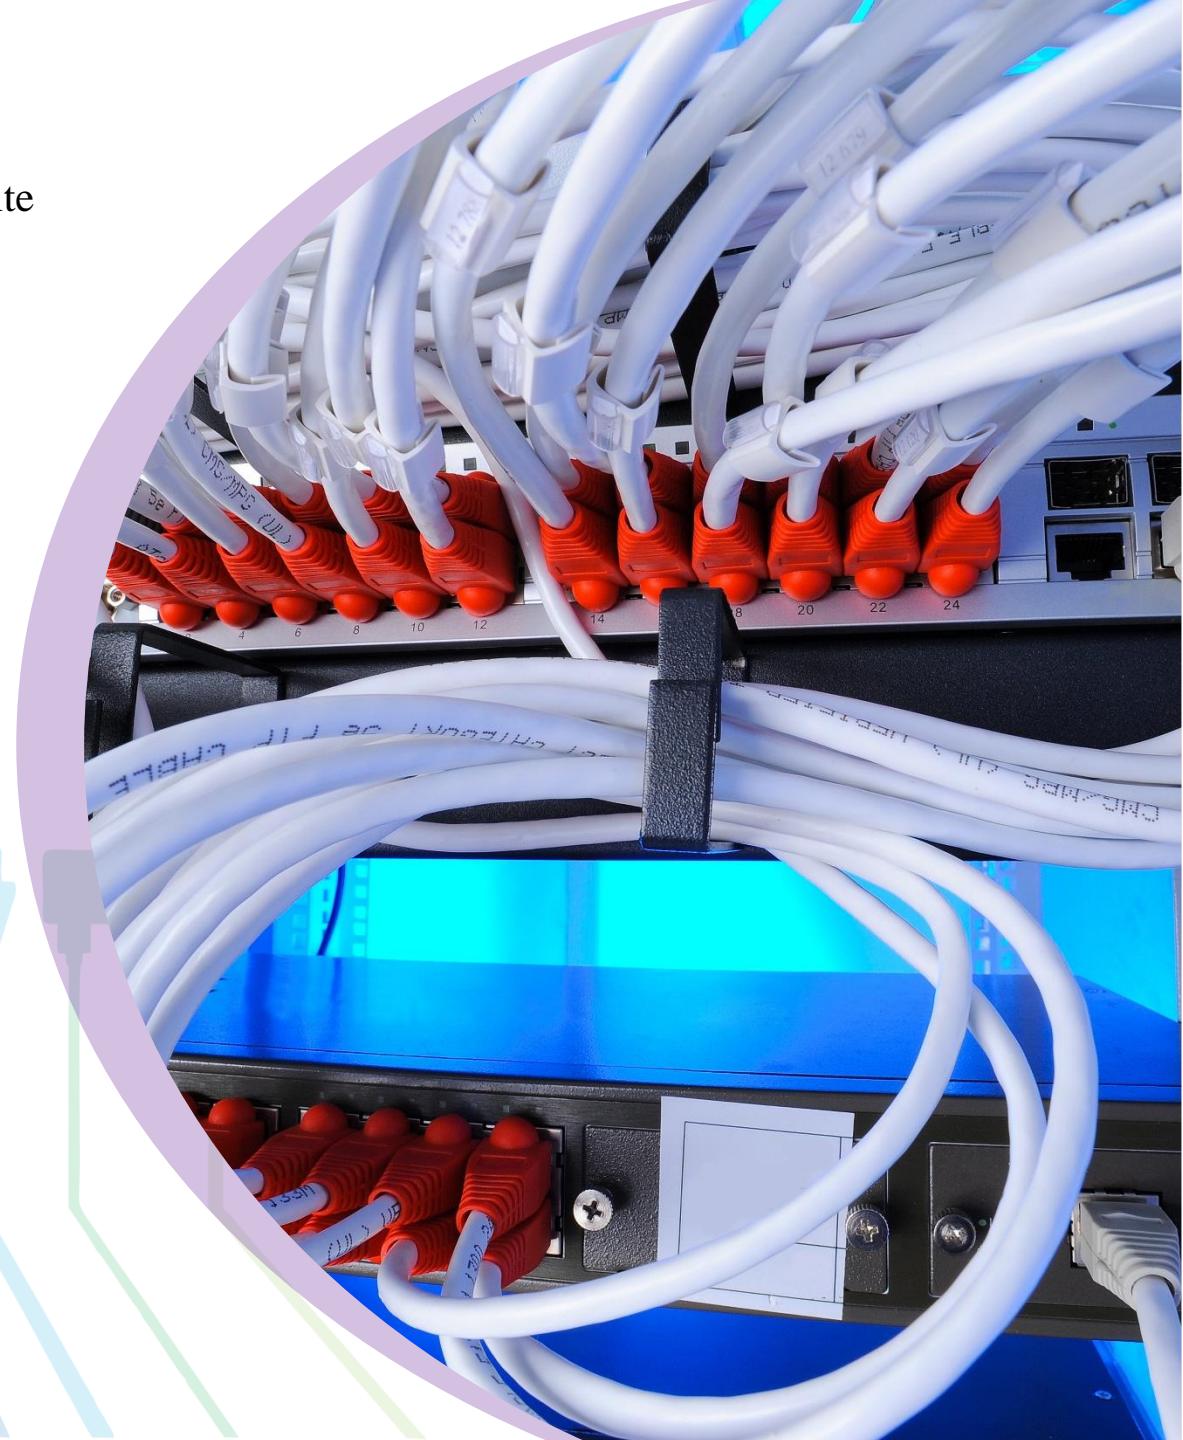

- Quality Control.
- Change Control.
- Progress Reviews.
- Risk / Issues Reviews and Updates.

Closing Phase

This phase Ensures the project has a distinct end-point and there is a definite transfer of ownership of the project outputs to the customer and/or support organization.

- Formal Acceptance of all Project Deliverables.
- Handover Documentation.
- Post Implementation Training (if required).
- Lessons Learnt.
- Commissioning.
- Validation of design concept and desired reliability level.
- Validation of intended systems operation as an integrated whole.
- Commissioning Deliverables.
- Factory Witness Tests.
- Construction Observation Comments.
- Pre-Functional Checklists.
- Functional Performance Tests.
- Written Report Documenting Results.

PROJECTS

GTB Data Centre, Nigeria

Total Data Centres, Lagos - Nigeria

Total Elf Data Centre, Port Harcourt - Nigeria

Zain Data Centres,
Lagos & Abuja Nigeria

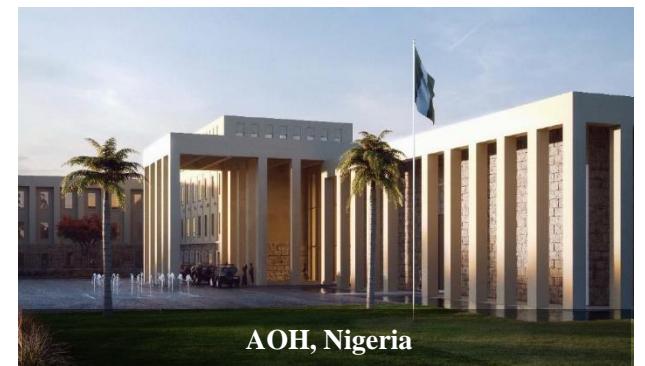

Zenith Bank Head Office, Ghana

Total Data Centres, Lagos - Nigeria

Rack Centre, Nigeria

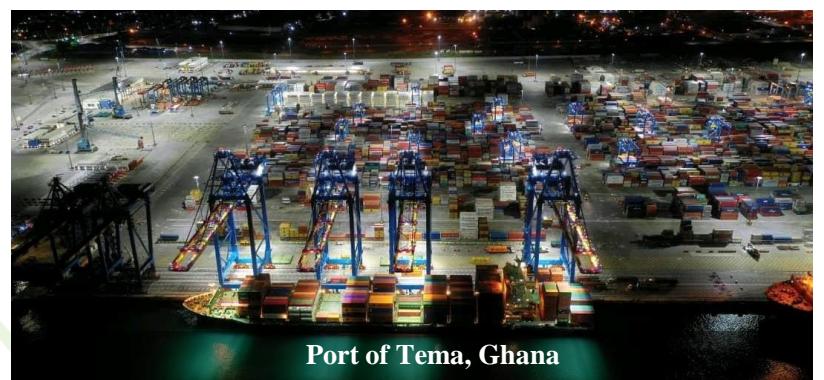

AOH, Nigeria

NCDMB Office Complex, Nigeria

Access Bank Corporate Head Office, Nigeria

Port of Tema, Ghana

PROJECTS

GTB DATA CENTRE, NIGERIA

The GT Data centre is a purpose-built facility, geared towards tier 4 certification; All cooling equipment is independently dual-powered, including chillers and heating, ventilating and air-conditioning (HVAC) systems, Fault-tolerant site infrastructure with electrical power storage and distribution facilities, all Electrical & Mechanical works were executed by Lambert Electromec Limited

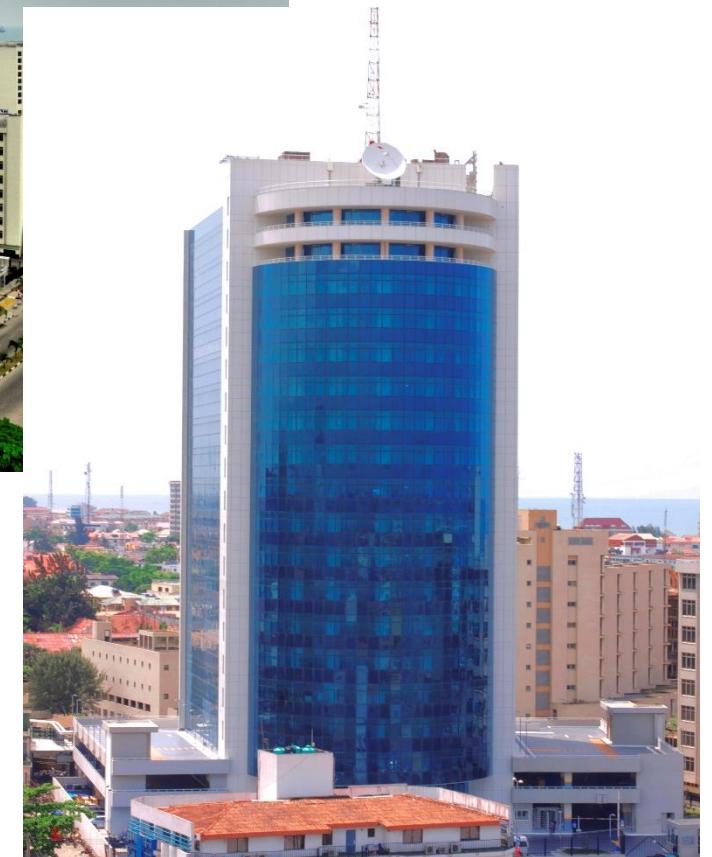

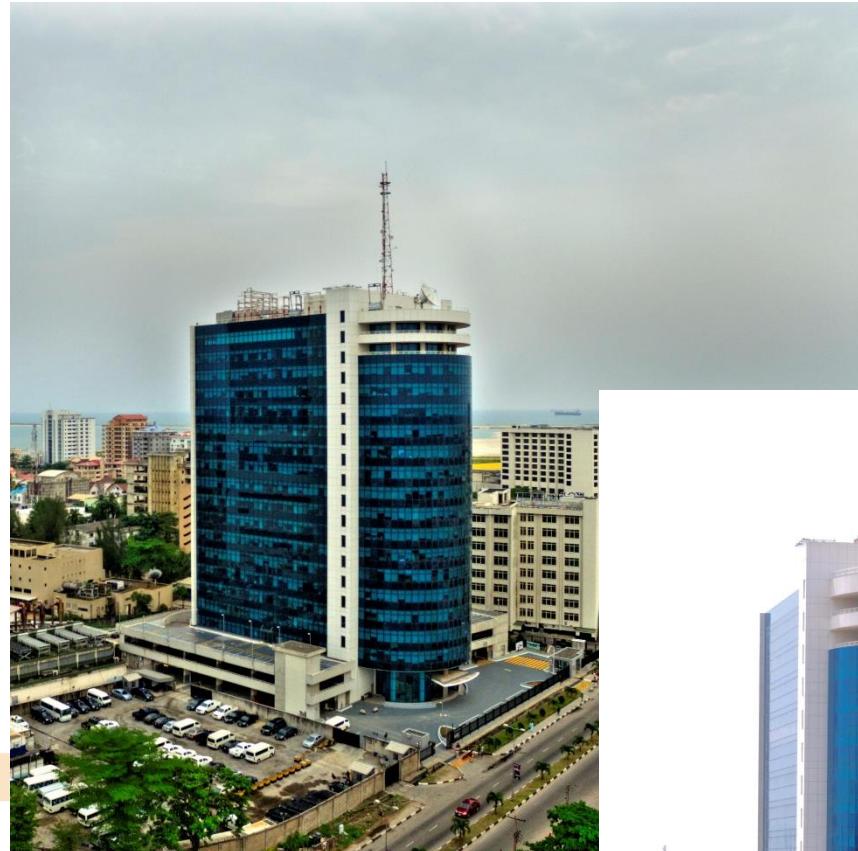

GTB DATA CENTRE - TECHNICAL INFORMATION

Project name	GTB Data Centre
Project Location	Lagos - Nigeria
Client's Name	GT Bank Plc
Architect	ACCL
MEP Consultant	MFA PARTNERSHIP
Main Contractor	C&D
Buildings Count & Names	Main building Utility Building
Main Building Nr. of Floors	3 floors
Data Centre Configuration	Tier level 3 Number of Racks : 75 6PDU Racks
Cooling System	Chillers /In Raw Ac For Data Center Floor Other Floor /Offices :VRV System
Mechanical System (Features only)	Chilled Water Pipes Fire Fighting System WTP Borehole
Electrical System	2nos RMU 3nos Transformers (2 Nos 500+1Nos 350KVA) Synchropanels ,ATS, Main Distribution Panels ,3 NOS 250KVA Synchronized UPS - 96 HR Anatomy AVR Lighting
ELV System	Fire Alarm ,Access Control ,CCTV , Public Address System
Generators	3NOS (500KVA)+2NOS (350KVA)

PROJECTS

TOTAL E&P 2X DATA CENTERS, TELECOM ROOM, LAGOS - NIGERIA

Lambert Electromec executed the Engineering, Procurement, Installation & Commissioning for the complete ICT infrastructure project which consist of 2 data centres (tailored to meet a Tier 4 categorization) including Telecoms, BMS, PMS and security systems, as well as n+1 backup systems in, Lagos - Nigeria.

TOTAL E&P 2X DATA CENTERS, TELECOM ROOM - TECHNICAL INFORMATION

Project name	Total E&P 2X Data Centres, Telecom Room
Project Location	Lagos - Nigeria
Client's Name	Total - Eko Hotel
Architect	EGIS
MEP Consultant	EMB - APAVE FRANCE
Main Contractor	ITB
Project Area	3,000 Sqm
Project Built Area	35,000 Sqm
Buildings Count & Names	Eko Tower 1
Main Building Nr. of Floors	Basement + GF +18
Data Centre Configuration	15 Racks - 2 PDUs per Rack
Cooling System	Chilled Water System
Mechanical System (Features only)	2(1 Duty & 1 Standby)x450KW Dedicated Air Cooled Chillers 3rd Floor Data Center - 5(4 Duty & 1 Standby) x 25KW Precision Air Treatment Units 10th Floor Data Center - 5(4 Duty & 1 Standby) x 25KW Precision Air Treatment Units 10th Main Telecom Center - 4(3 Duty & 1 Standby) x 32KW Precision Air Treatment Units 3 FM200 Fire Suppression Systems
Electrical System	Lighting, emergency lighting, power, earthing, UPS 120KVA for 30min
ELV System	Access Control, Fire Alarm, CCTV, Telecom, Leak detectors, Humidity detectors, BMS
Generators	1000 KVA

PROJECTS

TOTAL / ELF DATA CENTRES AND TELECOM TOWER, PORT HARCOURT - NIGERIA

Execution of the Telecommunication and Data Centre implementation which includes the construction of an 80 meters high Telecom Tower, installed on top of a 6-storey building inside the TOTAL/ELF Main Office Extension, in Port Harcourt - Nigeria.

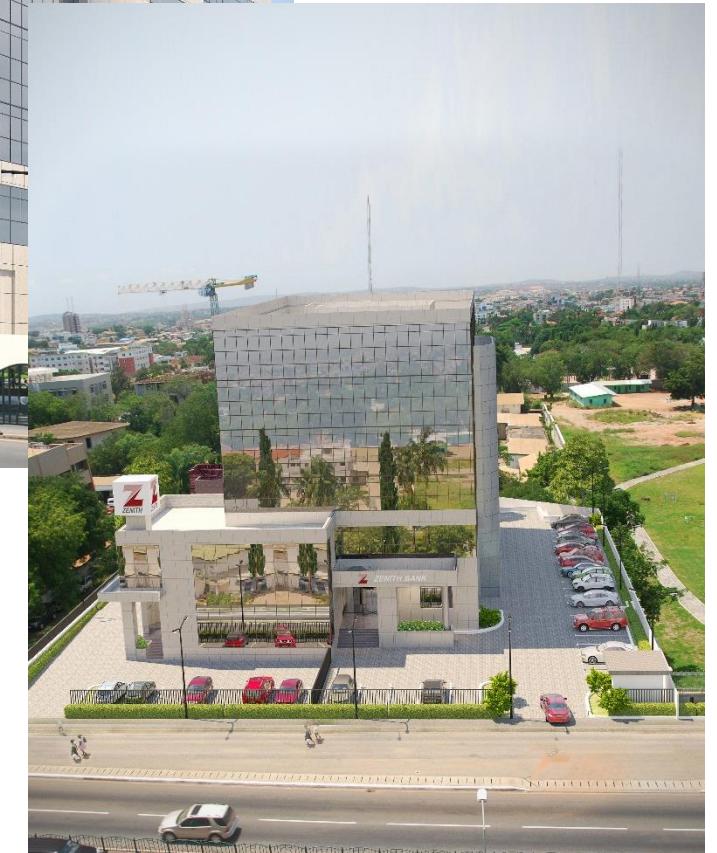

TOTAL / ELF DATA CENTRES AND TELECOM TOWER- TECHNICAL INFORMATION

Project name	Total ELF Data Centres and Telecom Towers
Project Location	Port Harcourt - Nigeria
Client's Name	Total ELF
Architect	S.M.I. International NIGERIA Ltd.
MEP Consultant	APAVE SUD -OUEST
Main Contractor	ITP
Project Area	Port Harcourt - Nigeria
Project Built Area	32,000m2
Buildings Count & Names	Admin Building Security Building Finance Building General Services Turbine area and Control Room
Data Centre Configuration	Tier 3
Cooling System	Crack Units
Mechanical System (Features only)	Crack Units
Electrical System	UPS
ELV System	Fiber
Generators	2 nos. 1250kVA

PROJECTS

ZENITH BANK HEAD OFFICE, GHANA

The Zenith Bank HQ has an indelible impression on the skyline of the ceremonial Independence Avenue in Accra. This elegant edifice comprises of prime Electro-mechanical features executed by Lambert Electromec Limited.

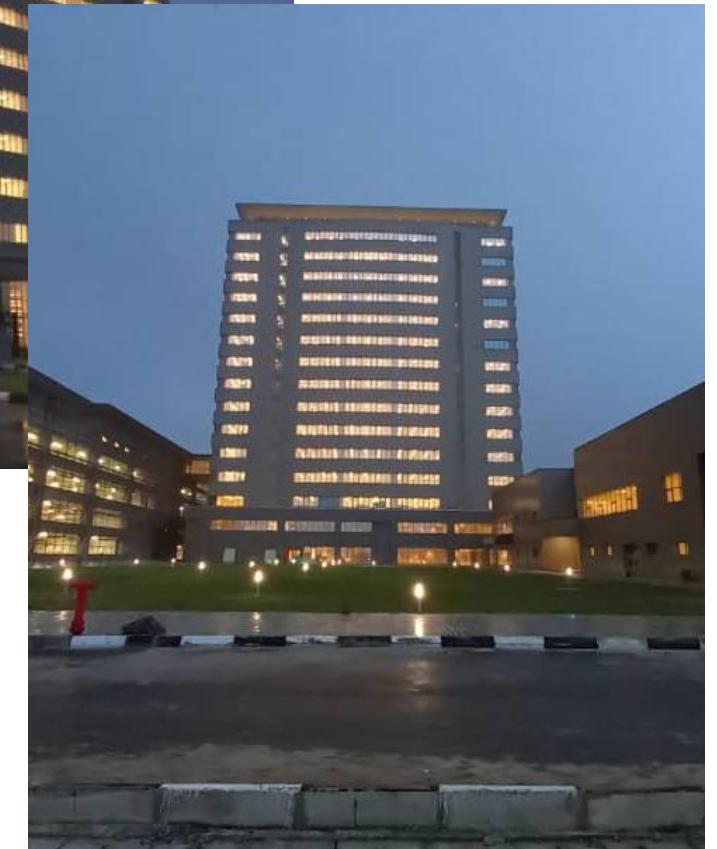

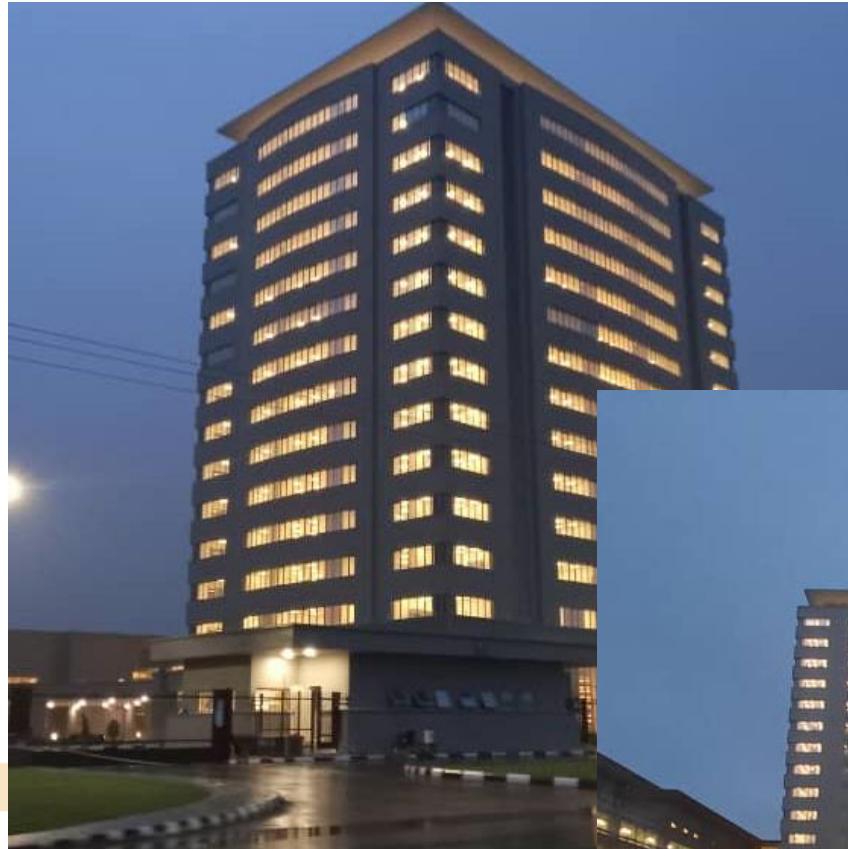

ZENITH BANK HEAD OFFICE - TECHNICAL INFORMATION

Project name	Zenith Bank Head Office
Project Location	Accra - Ghana
Client's Name	Zenith Bank
Architect	Interstate Architect
MEP Consultant	KOA
Main Contractor	DESIMONE
Project Area	2000 m2
Project Built Area	6600 m2
Buildings Count & Names	Zenith Bank Head Office
Main Building Nr. of Floors	5
Data Centre Configuration	Confidential (Not Disclosed)
Cooling System	Close Control AC Units
Mechanical System (Features only)	1- Close Control AC Units (2 Duty + 1 Standby) 2- NOVEC Fire Suppression System
Electrical System	1- Power 2- Lighting 3- UPS
ELV System	1-Fire Detection and Alarm 2- Data Systems
Generators	160 KVA Generators

PROJECTS

DATA CENTER OF THE NCDMB HQ OFFICE COMPLEX, NIGERIA

NCDMB Office Complex consists of 17 floors Office Building, Multi – floor Car Park and a two floor Conference Building. This Office Complex is ultra-modern and eco-friendly. Lambert Electromec employed the latest building principles and state- of-the-art Electrical and Mechanical installations in Bayelsa - Nigeria.

DATA CENTER OF THE NCDMB HQ OFFICE COMPLEX - TECHNICAL INFORMATION

Project name	NCDMB HQ Office
Project Location	Bayelsa - Nigeria
Client's Name	NCDMB
Architect	PWO
MEP Consultant	KOA
Main Contractor	Megatsar
Project Area	Yenagoa
Project Built Area	Yenagoa - Bayelsa - Nigeria
Buildings Count & Names	3 Buildings: Main Building / Conference Building / Car Park
Main Building Nr. of Floors	17 floor office 5 floor car park 2 floor conference building
Data Centre Configuration	Tier 2
Cooling System	Crac Units - Equipment are 2Nos 64.2kW as duty & 1No 64.2kW as Standby.
Mechanical System (Features only)	Chilled Water System
Electrical System	UPS
ELV System	Fiber backbone
Generators	6 No, 1250 KVA Each , Diesel Generator , Brand: Cummins

PROJECTS

ACCESS BANK CORPORATE HEAD OFFICE LAGOS - NIGERIA

Access Bank Corporate Head Office is strategically located in Victoria Island extension of Lagos and prides itself as a Grade A - high rise office complex. The complete Electrical & Mechanical systems offer optimal comfort and safety, a project executed by Lambert Electromec Limited.

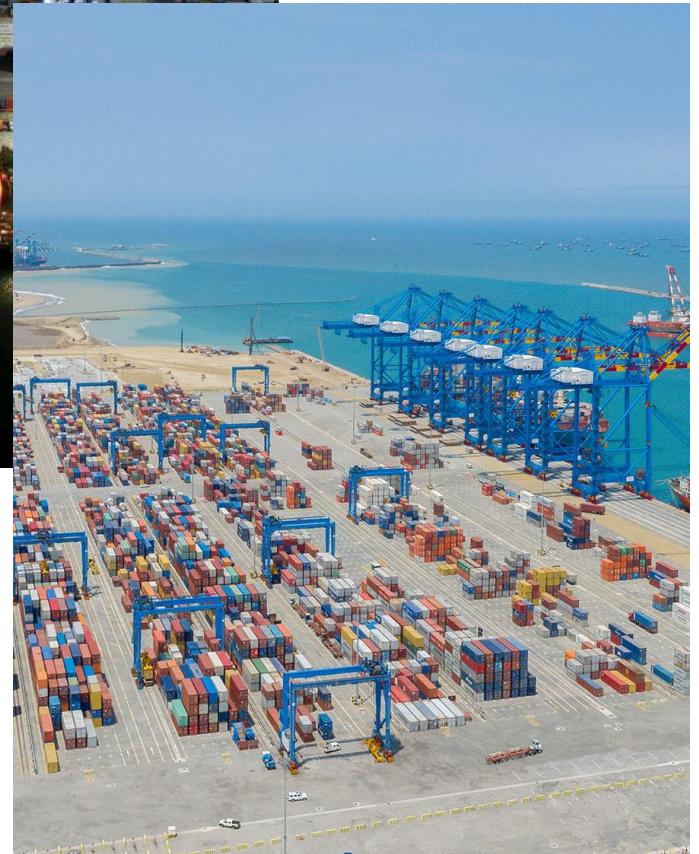

ACCESS BANK CORPORATE HEAD OFFICE- TECHNICAL INFORMATION

Project name	Access Bank Corporate Head Office
Project Location	Lagos - Nigeria
Client's Name	Access (Diamond) Bank
Architect	James Cubit Architects
MEP Consultant	CA Consultants
Main Contractor	Cappa D'Alberto
Project Area	8,396 Sqm
Project Built Area	25,589 Sqm
Buildings Count & Names	Access Bank Head Quarter
Main Building Nr. of Floors	15 Floors
Data Centre Configuration	10 Racks - 2 PDUs per Rack
Cooling System	Chilled Water System
Mechanical System (Features only)	4 (3 Duty x 1 Standby) 954KW Air Cooled Chillers 2 (1 Duty x 1 Standby) 84KW Precision Air Treatment Unit FM200 Fire Suppression System
Electrical System	Lighting, emergency lighting, power, earthing, UPS 200x4KVA for 30min
ELV System	Access Control, Fire Alarm, CCTV, Telecom, Leak detectors, Humidity detectors, BMS
Generators	1000 KVA

PROJECTS

PORT OF TEMA EXPANSION

Lambert Electromec provided the Electrical & Mechanical works for this fascinating Tema Port Expansion Project for Meridian Port Services (MPS). The EDGE Certified Port of Tema is designed to maximize the use of natural daylight while implementing technical solutions to reduce the consumption of energy and water.

POR T OF TEMA EXPANSION - TECHNICAL INFORMATION

Project namez	Port of Tema Expansion
Project Location	Accra - Ghana
Client's Name	Meridian Port Services
MEP Consultant	ARUP
Main Contractor	Consar
Project Area	4 Km2
Project Built Area	12000 m2
Buildings Count & Names	#1- MPS Administration Building. #2- GPHA (Ghana Port Harbour Authorities) Buildings. #3- Workshop Buildings.
Main Building Nr. of Floors	#1- 3 Floors #2- 3 Floors #3- 2 Floors
Data Centre Configuration	Confidential (Not Disclosed)
Cooling System	Close Control AC Units
Mechanical System (Features only)	1- Close Control AC Units 2- NOVEC Fire Suppression System
Electrical System	1- Power 2- Lighting 3- UPS
ELV System	1-Fire Detection and Alarm 2- Data Systems

PROJECTS

AOH, ABUJA

Lambert Electromec Limited is executing the Electrical and Mechanical works of AOH which consist of Office Building, Conference Hall, Restaurant, Foyer Building, Ancillary Buildings, Power House, Chiller Plant, Gate House and External works.

AOH, ABUJA - TECHNICAL INFORMATION

Project name	AOH - HQ
Project Location	ABUJA - Nigeria
Client's Name	NSA (National Security Advisor)
Architect	JBI
MEP Consultant	LAMBERT
Main Contractor	JBN
Project Area	3 Arms Zone , Inside National Assembly
Project Built Area	16000 sqm Approx
Buildings Count & Names	3 , Main Building , Power House & Gate House
Main Building Nr. of Floors	BF to 3 F + Terrace
Data Centre Configuration	Confidential (Not Disclosed)
Cooling System	Chilled Water System
Mechanical System (Features only)	HVAC System - DIKIN Chillers, FCU , DX units Plumbing System Drainage systems Diesel Fuel System Water Feature Systems
Electrical System	MV System - Siemens, LV System - Schneider , Generators - FG Wilson
ELV System	Fire Alarm System - BOSCH, Public Address System - BOSCH, EVC, CCTV - BOSCH, Access Control - BOSCH CATV - ALCAD , TEL /DATA - DIGITUS SYSTEM
Generators	FG WILSON = 800 KVA X 3 Nos

PROJECTS

RACK CENTER, NIGERIA

Rack Centre is a state-of-the-art, Tier III Certified data centre offering vendor-neutral colocation services. The data centre provides over 6,000 sqm of energy efficient and secure data centre space. Electrical & Mechanical works were executed by Lambert Electromec Limited.

PROJECTS

ZAIN DATA CENTERS, LAGOS AND ABUJA, NIGERIA

The successful execution of Zain new generation Data centers in both Lagos and Abuja. The project includes steel structure equipment room, Emerson Power pack prefabricated complete with Electrical and Mechanical infrastructures, security and access control systems, in Lagos & Abuja Nigeria, project executed by Lambert Electromec Limited..

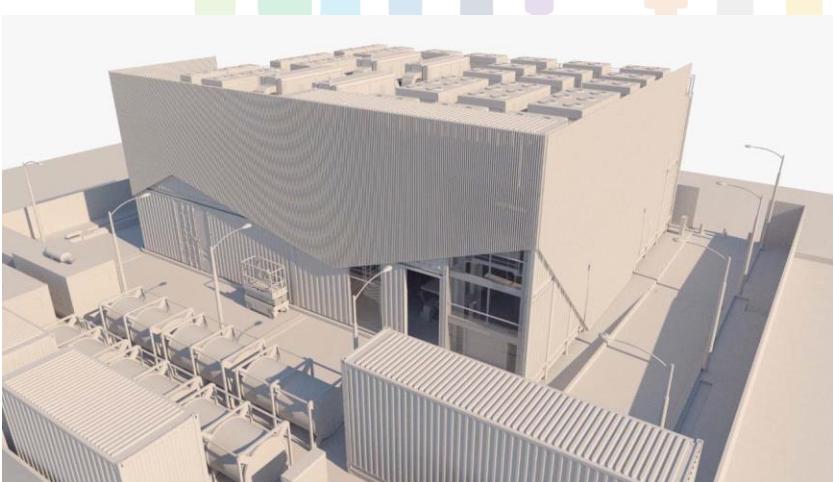

DESIGN ONLY

**DELTA REGIONAL CONTROL
CENTER (DRCC), EGYPT**

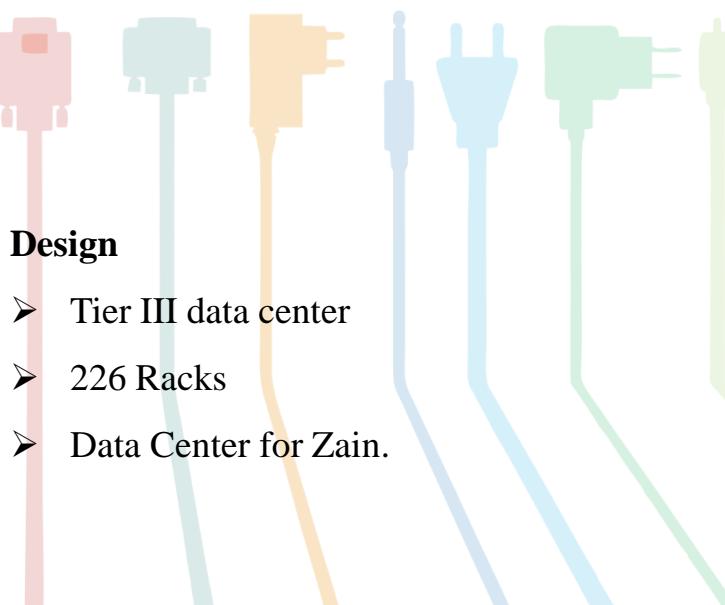

**ZAIN KUWAIT, SSB PHASE 2,
DATA CENTER PROJECT**

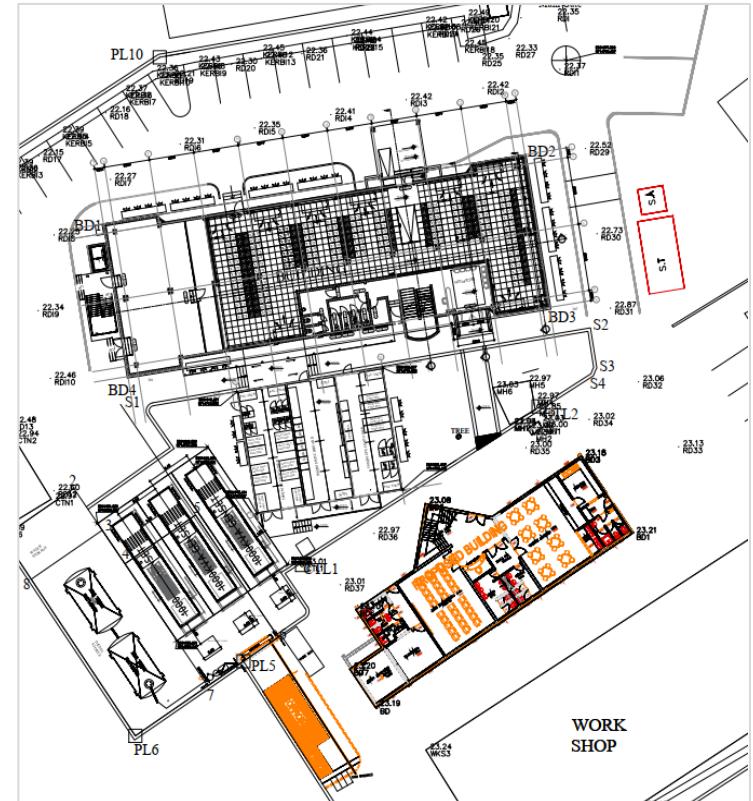

Design

- Tier III data center
- 32 Racks
- Data Center with control room for the ministry of electricity.

**MTN DATA CENTER
LAGOS, NIGERIA**

Design

- Tier III data center
- 226 Racks
- Data Center for Zain.

Design

- Tier III data center
- 106 Racks
- Data Center for MTN

CERTIFICATION

ISO 9001:2015 is an international standard dedicated to Quality Management Systems (QMS). It outlines a framework for improving quality and a vocabulary of understanding for any organization looking to provide products and services that consistently meet the requirements and expectations of customers and other relevant interested parties in the most efficient manner possible.

ISO 14001: 2015 is an internationally agreed standard that sets out the requirements for an environmental management system. It helps organizations improve their environmental performance through more efficient use of resources and reduction of waste, gaining a competitive advantage and the trust of stakeholders.

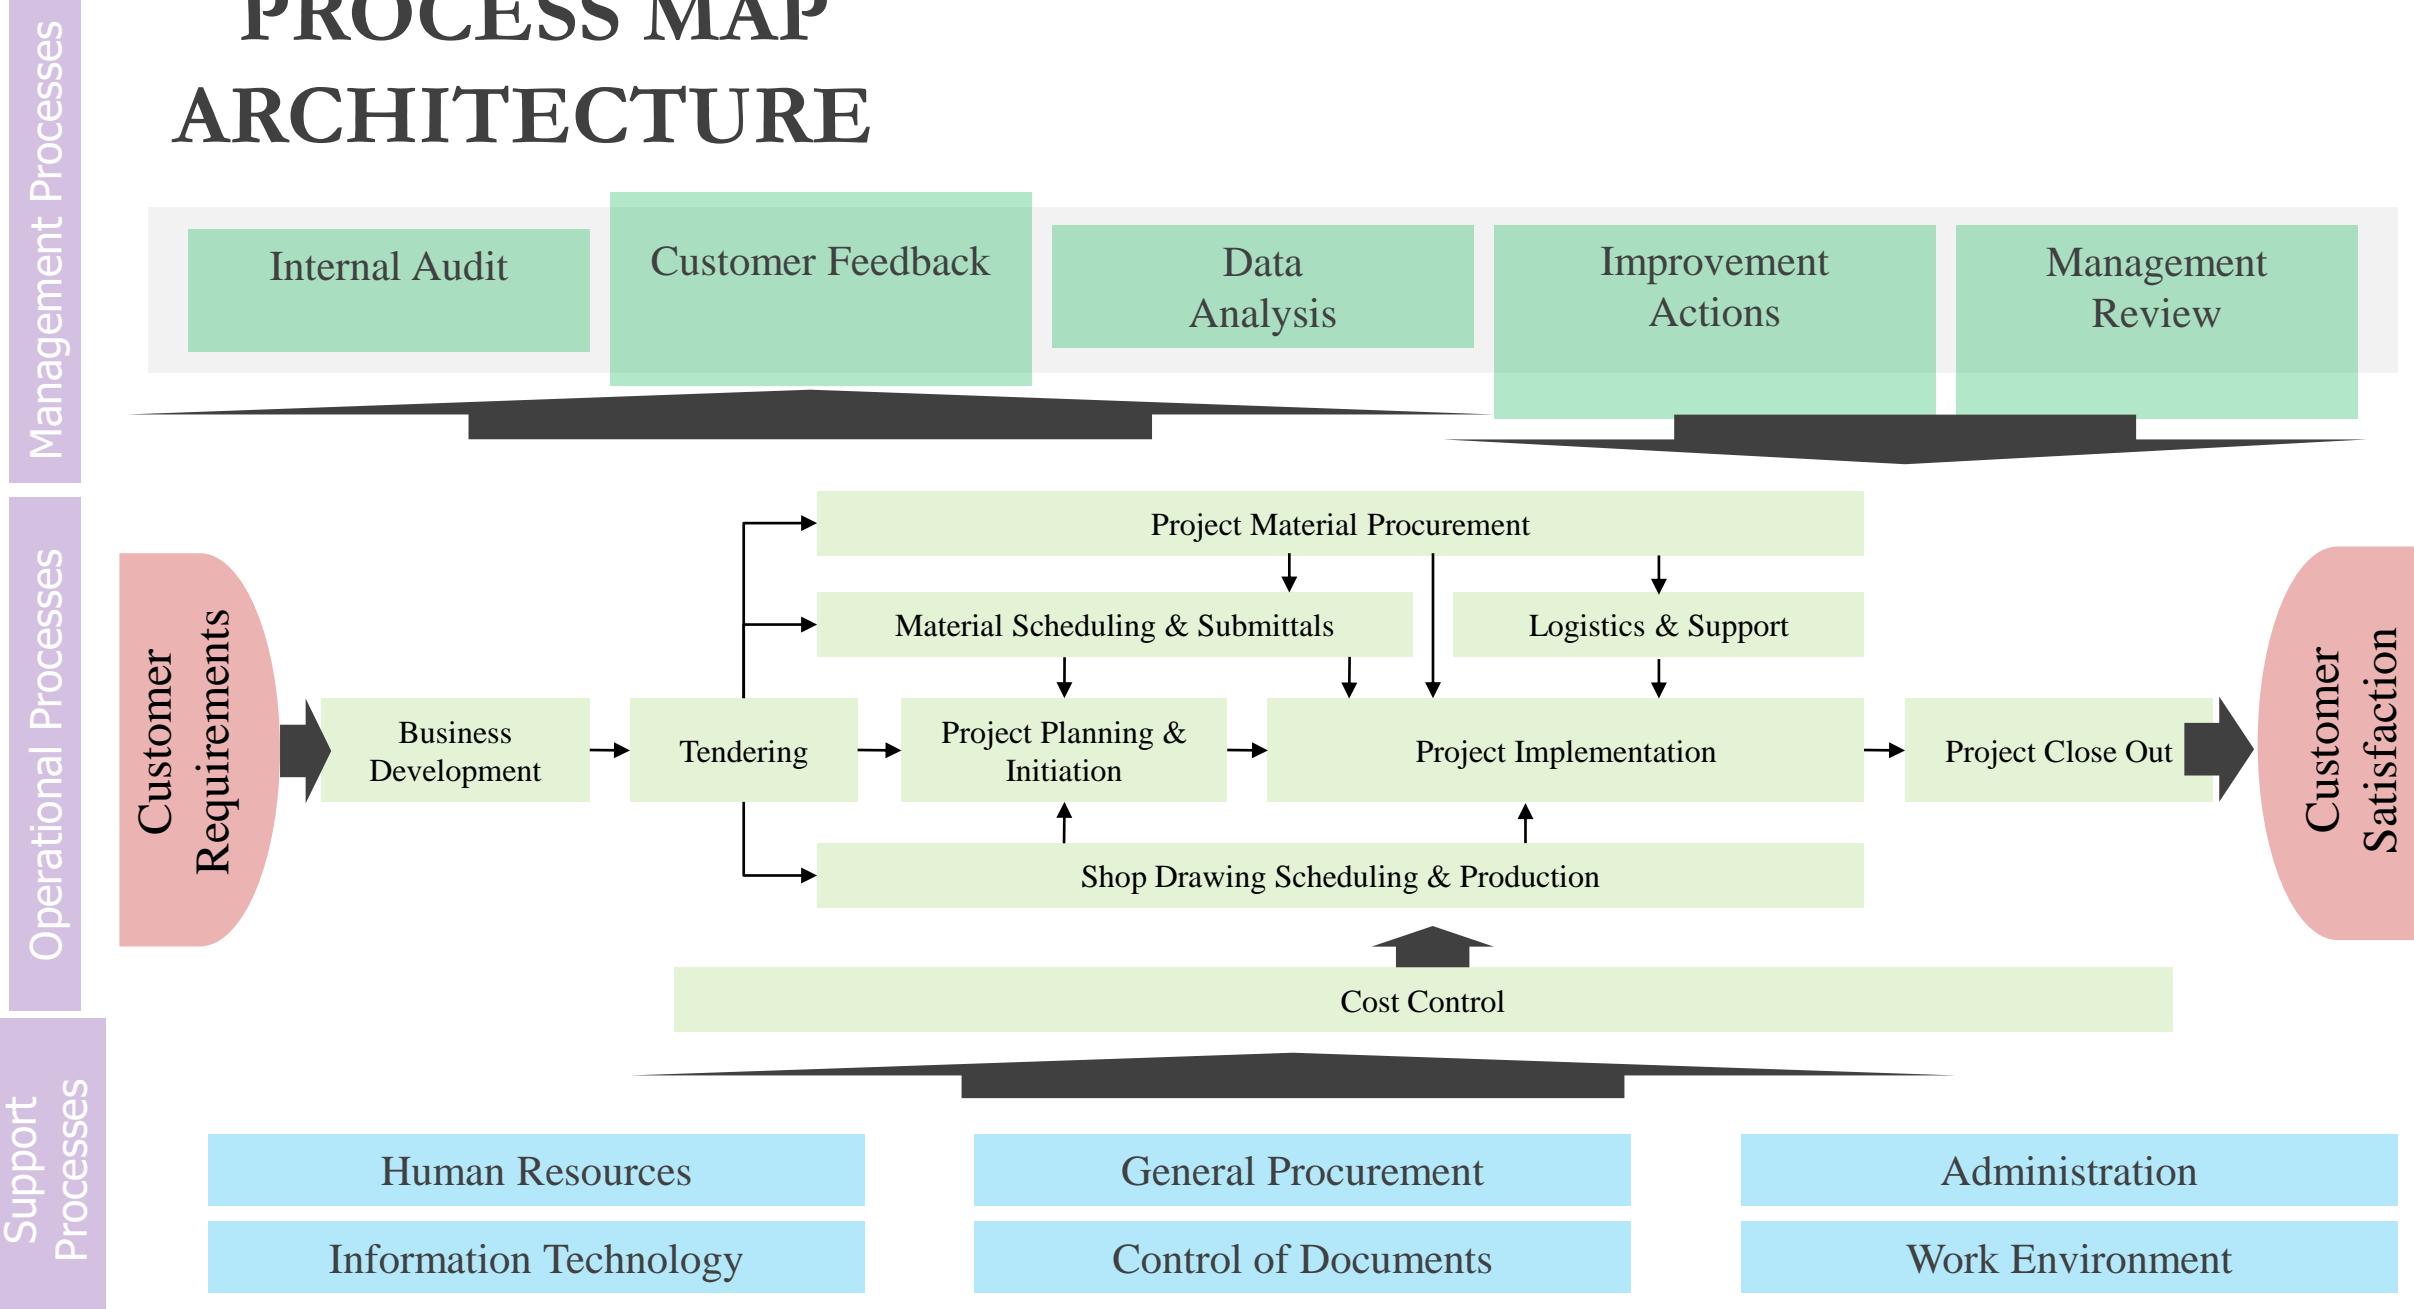

ISO 45001:2018 specifies requirements for an occupational health and safety (OH&S) management system, and gives guidance for its use, to enable organizations to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving its OH&S performance.
